PROVINCIAL AUDITOR'S REPORT.

Provincial Auditor's Office,
Toronto, January 20th, 1904.

To Hon. G. W. Ross,
Treasurer of Ontario.

I have the honour to present to you the Public Accounts for the year ended 31st December, 1903.

For the information of the Legislative Assembly, I beg to report the following over expenditures of appropriations as granted by the Supply Bill:

OVER EXPENDITURES AUTHORISED BY THE TREASURY BOARD.

49 Vict., Chap. 4, Sec. 20.

Civil Government: Education Department	**$200.00**

The undersigned respectfully reports to His Honour the Lieutenant-Governor-in-Council,—

That the sum voted for printing, stationery and contingencies of the Education Department, Civil Government, being the amount of the last five items of vote number three Eestimates, 1903, is exhausted, and as the balance remaining in the vote will be required in full for salaries at the end of the year, the undersigned respectfully recommends that a further approporiation of $200 be granted under the Act. R. S. O. 1897, chap. 23, sec. 20, to meet the further necessary petty expenses of the Department for the balance of the year.

Respectfully submitted,
(Sgd.) R. HARCOURT,
Minister of Education.

Education Department.
Toronto, October 22nd, 1903.

Copy of a Minute of the Treasury Board, dated the 27th day of October, A.D. 1903.

Upon consideration of the report of the Honorable the Minister of Education, dated the 22nd day of October, A.D. 1903, the Treasury Board doth hereby pursuant to the provisions of section 20, cap. 23, R.S. O. 1897, authorize the issue of a warrant for the sum of two hundred dollars ($200) to meet further necessary petty expenses of the Education Department for the balance of the year, the sum voted for printing, stationery and contingents having become exhausted.

Certified.
J. LONSDALE CAPREOL,
Clerk Treasury Board

Civil Government : Public Works Department	**$910.04**

Department of Public Works,
Toronto, December 9th, 1903.

The undersigned begs to report to his Honour the Lieutenant-Governor-in-Council:

That the appropriation for salaries and expenses of the Public Works Department and its branches is now nearly exhausted and to meet December salaries an additional $910.04 is required.

The undersigned, therefore, recommends that authority be given under R.S.O. cap. 23, sec. 20, for the issue of a warrant for the said sum of $910.04.

(Sgd.) F. R. LATCHFORD,
Commissioner.

Copy of a Minute of the Treasury Board, dated 10th December, A. D. 1903.

Upon consideration of the report of the Honourable the Commissioner of Public Works, dated 9th day of December, A.D. 1903, the Treasury Board doth hereby, pursuant to the provisions of section 20, cap. 23, R.S.O., 1897, authorize the issue of a warrant for the sum of nine hundred and ten dollars and four cents in favor of the Honourable the Treasurer, such sum being required to complete the payment of salaries for the month of December, in connection with the Public Works Department and its branches, the appropriation for said purpose having become exhausted.

Certified,

J. LONSDALE CAPREOL,
Asst. Clerk, Executive Council.

Civil Government: Provincial Secretary's Department	**642.41**

Toronto, December, 12th, 1903.

The undersigned begs respectfully to recommend that a Treasury Board warrant be passed for the sum of $642.41, being the amount expended by the Provincial Secretary's Department for salaries and expenses for the year 1903 in excess of the amount appropriated, which was caused by the necessity of obtaining additional assistance in the Department, owing to the increased volume of work and the absence through illness of some of the officials.

(Sgd.) J. R. STRATTON,
Provincial Secretary.

To His Honour
The Lieutenant-Governor in Council.

Copy of a Minute of the Treasury Board, dated the 15th day of December, A.D. 1903.

Upon consideration of the report of the Honourable the Provincial Secretary, dated the 12th day of December, A.D. 1903, the Treasury Board doth hereby, pursuant to the provisions of Section 20, cap. 23 R. S.O., 1897, authorize the issue of a warrant for the sum of six hundred and forty-two dollars and forty-four cents in favor of the Honourable the Treasurer, being the amount expended by the Provincial Secretary's Department for the year 1903, in excess of the amount appropriated which was caused by the necessity of obtaining additional assistance in the Department owing to the increased volume of work, and the absence through illness of some of the officials.

Certified,

J. LONSDALE CAPREOL,
Asst. Clerk, Executive Council.

Civil Government: Agricultural Department	**$217.44**
Agriculture	**12,156.62**

TORONTO, December 17th, 1903.

To His Honour
The Lieutenant-Governor-in-Council:

The undersigned begs to report that the appropriation for Agriculture has been exhausted and a number of accounts now in the Treasury Department are unpaid owing to lack of funds. These accounts should be paid at once. The reasons for the appropriation not being sufficient to meet all expenditures this year are as follows:—

Hitherto all revenues of the Eastern Dairy School arising from the sale of butter and cheese have been credited to this account. This year the receipts amounting to several thousand dollars are credited to the General Revenue Account of the Government and therefore the Eastern Dairy Account is about six thousand dollars larger than was provided for in the appropriation. The appropriation for 1903, as those of 1902, provided simply for net expenditure in this service.

Owing to the increase in the attendance at the Agricultural College, and the necessity for providing for maintenance of more buildings, the expenses of that institution have exceeded the outlays of the previous year and have been larger than could have been anticipated. It was considered advisable to lay in in advance a much larger supply of coal than usual for the coming winter, and the fuel purchases are over three thousand dollars in excess of the estimates.

I beg to recommend therefore that authority be given for the payment of the following accounts:—

Vr. 3725	A, P, Westervelt, Chicken Coops	$508 53
2726	A. P. Westervelt, Winter Fair Advertising	514 64

Clerk, Treasury Board.

Civil Government: Agricultural Department **$1,656.82**

TORONTO, December 12th, 1903.

The undersigned begs to report to His Honour the Lieutenant-Governor-in-Council:

That the appropriation for salaries and expenses of Agricultural Department is overdrawn to the amount of $1,656.82.

Appropriation, salaries and expenses of Agricultural Department (including Factory Inspectors)	$27,550 00
Expenditure, including December pay list	29,206 82
Excess	1,656 82

This excess of payments over the appropriation has been caused mainly by the following accounts for services being charged against this appropriation and for which no grant was made, the similar items last year having been charged under General Agriculture and Miscellaneous.

Thomas Lynch, wrapping reports and general office work	$540 00
David Cashman, Assistant Messenger	365 16
E. Conlin, Stenographer to Factory Inspectors	417 33

The undersigned respectfully recommends therefore, that authority be given under the Act R.S.O., 1897, Chap. 23, Sec. 20, for the payment of the amount $1,656.82 to cover the deficiency.

(Sgd.) JOHN DRYDEN,

Minister of Agriculture.

Copy of a Minute of the Treasury Board, dated 6th January, A. D. 1904.

Upon consideration of the report of the Honourable the Minister of Agriculture, dated the 12th day of December, A. D. 1903, the Treasury Board doth hereby, pursuant to the provisions of Section 20, Cap. 23, R.S.O., 1897, authorize the issue of a warrant for the sum of one thousand, six hundred and fifty-six dollars and eighty-two cents, ($1,656.82) in favor of the Honourable the Treasurer, to cover overdraft in connection with the appropriation for salaries and expenses of the Department of Agriculture, the excess of payments over the appropriation having been caused mainly by certain accounts for services being charged against said appropriation and for which no grant was made, similar items last year having been charged under "General Agriculture and Miscellaneous."

Certified,

J. LONSDALE CAPREOL,

Clerk, Treasury Board.

Legislation: Stationery, Printing and Binding **$14,000.00**

Toronto, Sept. 29th, 1903.

The undersigned respectfully reports to His Honour the Lieutenant-Governor-in-Council:

That the appropriation for Legislative printing and binding is exhausted, owing to the unusually large amount of work done in connection with last session.

The undersigned therefore respectfully requests that authority be given the Honourable the Provincial Treasurer under the Act R. S. O. 1897, cap. 23, sec. 20, to pay the accompanying certificate Warwick Bros. & Rutter, $14,000.

Your obedient servant,

(Sgd.) L. K. CAMERON,
King's Printer.

C. H. Sproule, Esq.,
Provincial Auditor,
Parliament Buildings.

Copy of a Minute of the Treasury Board dated the 30th day of September, A.D. 1903.

Upon consideration of the report of the King's Printer dated the 29th day of September, A.D. 1903, the Treasury Board doth hereby, pursuant to the provisions of section 20, cap. 23, R.S.O. 1897, authorize the issue of a warrant for sum of Fourteen thousand dollars ($14,000) in favour of Messrs. Warrick Bros. & Rutter on account of Parliamentary Printing and Binding, the appropriation for "Legislation" having become exhausted.

Certified,

J. R. CARTWRIGHT,
for Clerk Treasury Board..

Legislation: Stationery, Printing and Binding **$9,300.00**

The undersigned respectfully reports to His Honour the Lieutenant-Governor-in-Council:

That the appropriation for Legislative printing and binding has become exhausted.

That the attached accounts from the Riordon Paper Mills amounting to $11,331.84 are for paper used in connection with the printing ordered by the Legislative Assembly.

The undersigned therefore respectfully requests that authority be given the Honourable the Provincial Treasurer under Act R.S.O. 1897, Cap. 23, Sec. 20, to pay the accompanying certificates which will require an addition to the appropriation of $9,300 in all.

I have the honor to be

Your obedient servant,

(Sgd.) L. K. CAMERON,
King's Printe-

C H. SPROULE, ESQ.,
Provincial Auditor.

Copy of a Minute of the Treasury Board, dated 8th January, A. D. 1904.

Upon consideration of the report of the King's Printer, approved by the Honourable the Treasurer, dated the 7th day of January, A.D. 1904, the Treasury Board doth hereby, pursuant to the provisions of Section 20, Cap. 23, R.S.O., 1897, authorize the issue of a warrant for the sum of nine thousand three hundred dollars ($9,300)in favour of the Honourable the Treasurer, for the payment of certain accounts of the Riordon Paper Mills, the appropriation for Legislative Printing and Binding having become exhausted.

Certified,

J. LONSDALE CAPREOL,
Clerk Treasury Board.

Public Institutions Maintenance, Toronto Lunatic Asylum $6,012.52

Re MAINTENANCE TORONTO ASYLUM.

TORONTO, DEC. 21, 1903.

SIR,

I beg to report that the maintenance appropriation at Toronto Asylum has been insufficient to meet the expenditure, and that the indebtedness to be paid amounts to $6,012.52.

The overdraft is in consequence of the expenditure for fuel, a large sum for which had to be paid during the current year for that which should have been delivered last season, but the coal not being delivered by contractor could not be paid for in 1902. This has resulted in the payment for the present year of the sum of $16,935.63, and the amount of the appropriation was only $10,000, thus showing an expenditure of $6,435.63 over and above the amount of the appropriation.

I would therefore beg to recommend that authority be given under R.S.O. Cap. 23, Sec. 20, for the issue of a Treasury Board warrant for the sum of $6,012.52 in order that the accounts for December may be paid.

Your obedient servant,

R. CHRISTIE,
Inspector.

C. H. SPROULE, ESQ.,
Provincial Auditor, City.

Approved,
J. R. STRATTON,
Provincial Secretary.

Copy of a Minute of the Treasury Board, dated 31st December, A.D. 1903.

Upon consideration of the report of Mr. Inspector Christie approved by the Honourable the Secretary, dated the 21st day of December, A.D 1903, the Treasury Board doth hereby, pursuant to the provisions of section 20, cap. 23, R.S.O., 1897, authorize the issue of a warrant for the sum of six thousand and twelve dollars and fifty-two cents ($6,012.52) for the payment of certain accounts for December, in connection with the maintenance of the Asylum for the Insane, Toronto, the appropriation for said Institution having become exhausted in consequence of the expenditure for fuel, a large sum for which had to be paid during the current year for that which should have been delivered by the contractor last season, and which could not be paid for in 1902.

Certified,

J. LONSDALE CAPREOL,
Clerk, Treasury Board.

Public Institutions Maintenance: Deaf and Dumb Institute........ .... $2,428.37

RE MAINTENANCE DEAF AND DUMB INSTITUTE.

December 30th, 1903.

SIR:—I beg to report that the appropriation for the maintenance for the Institution for the Deaf and Dumb at Belleville has been insufficient to pay the expenditure necessary for the current year, and that there is the sum of $2,428.37 required over and above the amount of the appropriation.

I would therefore recommend that an Order-in-Council be passed authorizing the sum of $2,428.37, being the amount required to pay the December accounts for the Institution at Belleville, after applying the balance on hand for that purpose be charged to the appropriation for "Unforseen and Unprovided."

Your obedient servant,

(Sgd.) T. F. CHAMBERLAIN,
Inspector.

The Honourable
The Provincial Secretary.

Certified Correct,

T. F. CHAMBERLAIN.

Approved,
J. R. STRATTON,
Provincial Secretary.

Office of the Inspector of Prisons, &c., Toronto, Dec. 31st, 1903.

Copy of a minute of the Treasury Board, dated 30th December. A.D. 1903:

Upon consideration of the report of the Honourable the Provincial Secretary dated the 30th day of December, A.D. 1903, the Treasury Board doth hereby pursuant to the provisions of Section 20, Cap 23, R.S. O. 1897, authorize the issue of a warrant for the sum of two thousand four hunderd and twenty-eight dollars and thirty-seven cents ($2,428.37) in favour of the Honourable the Treasurer, being the amount necessary to meet the overdraft on maintenance account in connection with the Institution for the Deaf and Dumb, Belleville, caused by the serious epidemics of Diphtheria, Scarlet Fever, Mumps, etc., since re-opening of the Fall term,

Certified,

J. LONSDALE CAPREOL,
Clerk, Treasury Board.

Public Buildings: Blind Institute **$1,015.09**

OFFICE OF THE INSPECTOR OF PRISONS AND PUBLIC CHARITIES, ONTARIO.
TORONTO, September 30th, 1903.

Re PRINCIPAL'S HOUSE INSTITUTION FOR BLIND.

SIR,— I beg to transmit herewith accounts amounting in all to $1,498.79.

This expenditure has been incurred in renovating and refurnishing the Principal's residence at the Institution for the Blind, Brantford, upon the appointment of Mr. Herbert Gardiner to the position of Principal. As this was an unforseen expenditure, and the appropriations for the year are insufficient to cover it, I beg to request that you will submit these accounts to the Treasury Board with a view to receiving authority to pay the same.

Your obedient servant,

(Sgd.) T. F. CHAMBERLAIN,

C. H. SPROULE, ESQ.,
Provincial Auditor,

PROVINCIAL AUDITOR'S OFFICE.
September 29th, 1903.

Memo. for DR. CHAMBERLAIN,
Re Blind Institute, Brantford.

Your recommendation of the 25th inst. calls for payments amounting to $1,498.79 on capital account of above institution. As the balance at the credit of this account is only $483.70 a Treasury Board order would be required for the difference, viz, $1,015.09.

This is on the assumption that these accounts should be charged to Capital Account. In my opinion, however, they and all other accounts for renewal of furniture and furnishings in the public institutions should be charged to the Maintenance Account.

(Sgd.) C. H. SPROULE,
Provincial Auditor.

DR. CHAMBERLAIN,
Inspector P. I.

With reference to the attached report from Mr. Inspector Chamberlain, the undersigned approves thereof and begs to recommend that an Order-in-Council be passed authorizing the payment of the accompanying accounts amounting to the sum of Fourteen hundred and ninety-eight dollars and seventy-nine cents ($1,498.79) being the expenditure incurred in renovating and refurnishing the Principal's residence at the Institution for the Blind, Brantford, upon the appointment of Mr. Gardiner to the position of Principal.

(Sgd.) J. R. STRATTON,
Provincial Secretary.

To His Honour,
The Lieutenant-Governor-in-Council.

Copy of a Minute of the Treasury Board, dated 14th October, A. D. 1903.

Upon consideration of the report of Mr. Inspector Chamberlain, approved by the Honourable the Provincial Secretary, dated the 30th day of September, A.D. 1903, the Treasury Board doth hereby pursuant to the provisions of Section 20, Cap. 23, R.S.O. 1897, authorize the issue of a warrant for the sum of One thousand and fifteen dollars and nine cents, ($1,015.09), in favour of the Honourable the Treasurer, being the amount required to cover the deficiency in the appropriation capital account *re* Blind Institution, Brantford, for the payment of the accompanying accounts amounting to ($1,489.79) for renovating and refurnishing the Principal's residence, upon the appointment of Mr. Herbert Gardiner to the position of Principal.

TREASURY BOARD OVER-RULINGS.

49 Vic. Chap. 4, Sec. 9, Sub-Sec. 4.

PROVINCIAL AUDITOR'S OFFICE.
TORONTO, June 22nd, 1903.

Memo. for the Treasurer *re* Treasury Voucher No. 1570.

The claim of Messrs. McPherson, Clark, Campbell and Jarvis for a refund in connection with certain Michipicoten mining lands has been reported against as follows:—

(1) Hon. Mr. Gibson—See	C.L.L. fyle	No.	26,524½—1899.
(2) Hon. Mr. Davis—	do.	No.	31,278—1899.
(3) G. B. Kirkpatrick—	do.	No.	32,672—1899.
(4) Dr. Kennedy—	do.	No.	1,361—1900.

Having these reports in view, I do not think the applicants are entitled to a refund and I would therefore respectfully suggest that the matter be referred to the Treasury Board for decision.

(Sgd.) C. H. SPROULE,
Provincial Auditor.

HON. GEO. W. ROSS,
Premier and Treasurer.

Copy of a Minute of the Treasury Board, dated the 2nd day of July, A. D. 1903.

Upon consideration of the report of the Honourable the Commissioner of Crown Lands, dated the 30th day of June, A.D. 1903, the Treasury Board doth hereby pursuant to the provisions of sub-section 4 of section 4 of section 9, chapter 23, R.S.O., 1897, authorize the payment to Messrs. McPherson, Clark, Campbell and Jarvis, Barristers, Toronto, of the sum of Thirteen thousand seven hundred and ninety-eight dollars ($13,798), being a refund of moneys paid in by them on the application of clients for mining lands on Michipocoten Island, such refund being made in view of the practice of the Department of Crown Lands in the past, and of the opinion of the Attorney-General's Department that they would probably recover the amount in a court of law were a fiat granted them to bring an action in the matter.

Certified,
J. LONSDALE CAPREOL,
Clerk, Treasury Board.

C. H. SPROULE,
Provincial Auditor.

REPORT

OF THE

COMMISSIONER OF CROWN LANDS

OF THE

PROVINCE OF ONTARIO

FOR THE YEAR

1903.

To His Honor the Honorable William Mortimer Clark, *Lieutenant-Governor of the Province of Ontario*:

May it Please Your Honor:

As required by law, I submit for the information of Your Honor and the Legislative Assembly, a report for the year ending on the 31st December, 1903, of the management, etc., of the Crown lands of the Province.

Clergy Lands.

The area of clergy lands sold during the year was 94½ acres, aggregating in value $80.25. The collection on account of these and former sales was $4,095.95. (See appendix No. 3, page 4).

Common School Lands.

The area of common school lands sold during the year was 1-3 acre, the value of which was $20, the collection on account of this and former sales was $10,465.00. (See appendix 3, page 4).

Grammer School Lands.

The area of these lands sold during the year was 100 acres, at a price equalling $100. The collection on account of these sales and those of former years was $1,450.45. (See appendix No. 3, page 4).

University Lands.

The area of these lands sold during the year was 3,740¾ acres, the aggregate value of which was $1,891.37. The collection on account of these and sales of former years was $1,347.86. (See appendix No. 3, page 4).

Crown Lands.

During the year 1903 there were sold for agricultural purposes 80,466 acres, aggregating in value $55,569.25. The collections on account of these sales and those of former years were $65,640.27. There were sold for mining purposes 6,437 acres for $15,123.89. There was received on account of the conversion of mining leases into patents $7,117.75. The collections on account of mining leases were $14,528.63. There were leased for mining purposes 32,527 acres, at a rental of $33,177.61. The collection on account of fees and former leases was $48,412.59. The total area of Crown lands disposed of during the year was 123,995 acres. The total collection on account of Crown lands was $147,014.05.

The volume of settlement in the newer parts of the Province during the year has been on the whole very satisfactory. The sales of agricultural lands have exceeded those of last year by 13,578 acres.

The great influx of home-seekers into the Temiskaming region during the last two or three years has been on so large a scale as to exhaust the land available for settlement in those areas which are convenient to navigation or colonization roads, but the rapid opening up of the region by new roads and railway construction will soon make available the immense area of clay land lying north and west of the present settlement, in which area a number of new townships were surveyed during the past summer. There was such a desire to obtain land in the Temiskaming region that a number of people applied for lands which they were not prepared to take possession of. The attempt to hold lands for long periods without making improvements was found to be a hindrance to the progress of that region, the great requirement of which is population. In order that no injustice might be done to those claiming lands, and that settlement regulations might be enforced, an officer, under the title of Homestead Inspector, has been appointed, whose duty it is to report to the Department upon cases where there is a non-compliance with the settlement conditions as to residence, clearing, etc. It is expected that the presence of such an officer will have a good effect in causing people to be more prompt and active in going into actual residence and doing their share towards building up that country.

In other parts, such as from North Bay west to Sudbury, and from Sudbury to Sault Ste. Marie, considerable land has been disposed of, and a number of settlers have gone in. In the Wabigoon region there has been some increase in population, and it is hoped that certain industries of considerable magnitude which are projected in the Town of Dryden, in this district, will have the effect of attracting population to the promising land available, and capable of affording homes for a number of people. There is believed to be a good field for settlement in the townships surveyed along the Nepigon River, which have been somewhat neglected because they lay off the line of railway. The erection of a large pulp mill on this river, which is now assured, and the construction of the Thunder Bay, Nepigon & St. Joe Railway up the valley of this beautiful stream, will speedily bring it to the notice of people in search of homes.

The free grant districts have received a good deal of attention from those in search of free land. In the Thunder Bay Agency there has been a satisfactory growth in the population, a number of settlers having come in from the United States, and a few from the mother country. The railway construction which has been going on in that region during the past few years has given employment at good wages, and the erection of wharves and elevators at Port Arthur and Fort William has caused the expenditure of large sums of money, so that there has been plenty of employment at remunerative wages. The towns of Port Arthur and Fort William have made great progress, and now contain a population approaching 12,000.

The Rainy River District has made great strides during the past year.

A large number of first-class settlers have come in from the United States, from the older Provinces, and even from the prairies of the West. It would be impossible to find a region which holds out greater inducements to settlers than this alluvial valley of the beautiful river which here is the boundary line between Canada and the United States; good soil, well timbered, easily cleared, every tree almost having a market value and readily saleable; good climate, where all kinds of grain and vegetables come to a luxuriant maturity, and many kinds of fruit ripen; there would seem little left to be desired by those in search of homes, where comfort and plenty will soon reward prudence and energy. A number of towns have sprung up along the river front, the principal ones being Fort Frances and Rainy River; the latter, a new town, which has arisen within a couple of years, and has already a population of over 1,300. Two large saw mills are erected here, employing some six or seven hundred men. The Canadian Northern Railway also crosses the river at this point into the State of Minnesota.

Fort Frances is a prosperous and flourishing town, with a population of over one thousand, and the promised early development of the great water power which at present is running idly by will soon cause this point to become an important manufacturing centre.

There are also the Villages of Emo and Stratton, the former of which is understood to have a population of eleven hundred, and the latter a population of five hundred. All these places are on the Ontario bank of the Rainy River.

The Towns of Rat Portage and Keewatin also in this district, are prosperous and progressive.

The older free grant districts do not attract many newcomers, and this is not to be wondered at, when the length of time the lands have been open for settlement is borne in mind, and the fact that the best lands have been selected, and only the rougher class are unlocated.

The Department has had to insist upon a more strict compliance with the conditions of settlement, and to cancel those locations which were being held unimproved, and with the objection of disposing of the timber other than pine growing upon them. Where all kinds of timber have become valuable there is a tendency to locate lands unsuitable for farming. The timber licensees naturally object to lands which have no agricultural value being withdrawn from their licenses to enable others to realize on the timber and then abandon them. In order that justice may be meted out, it has become expedient in the public interest to inspect lands applied for, so that the Department may know whether they are being taken up for the purpose of denuding them of their timber, or for bona fide settlement. It is not in the interest of the Province that it should be deprived of revenue to which it is entitled in order that some speculator may make several hundred dollars ;it is not fair to the licensee that his timber should be taken from him.to enrich speculators, nor is it in the interest of the free grant districts that their lands should be stripped of timber, and then left as an eyesore and nest for fire. On the other hand, it is important that lands which are suitable for agricultural purposes, and from which the pine timber has been cut away, should be freely opened for settlement.

By this system of inspecting all lands applied for in the old free grant districts, the Department is enabled to locate settlers only on those lots from which the pine timber has been removed, and which contain such a percentage of agricultural land as will enable a settler to make a living upon them. The inspection and obtaining of the official information entails a little delay in dealing with the applications, but the course pursued is believed to be in the general interests of the Province. The stricter enforcement of the conditions of settlement has increased the number of cancellations. There has been an increase in the number of locations, in the number of purchasers, and in the number of patents issued.

MILITARY GRANTS.

During the year 1902 there were 6,600 certificates issued, authorizing parties to select their land under 1 Edward VII., cap. 6. There was a further issue this year of 3,650, making a total of 10,250 certificates issued to date. So far about 300 of those to whom certificates were issued have made their selection, 2,000 of which have been approved. The clerical work of the branch has not decreased, during the year some 11,500 letters having been received and answered in connection with these land grants. There are still some applications under consideration.

THE MINING INDUSTRY.

The backbone of the mining industry in Ontario is nickel, of which this Province possesses perhaps the most extensive deposits known to exist. For some years the quantity of nickel produced in the mines of the Sudbury district has been steadily increasing, and in 1903 rose to the highest point yet reached, the output being 6,998 tons, having a value at the works of $2,499,068. The nickel is in the form of matte, which in the works of both the Canadian Copper Company and the Mond Nickel Company is now raised to a richness varying from 70 to 80 per cent. of nickel and copper combined, as against 30 or 35 per cent. of metallic contents up to two or three years ago. The new works of the Canadian Copper Company, which are to replace the old plant at Copper Cliff, and which embody the most modern ideas in this branch of metallurgy, are well on their way to completion, and are expected to come into operation during the spring of 1904. The plants and mines of the Mond Nickel Company and the Lake Superior Power Company, which were working for a considerable part of the year, are at present closed. The quantity of copper produced from the nickel-copper ores of Sudbury and the non-nickeliferous deposits of other portions of the Province was 4,731 tons, having a value in the ore or matte of $641,726.

The possibilities lying latent in northern Ontario, as well as the advantages of building railways in mineral districts, were well illustrated in the autumn of 1903 by the discovery immediately alongside the line of the Temiskaming & Northern Ontario Railway, while construction work was going on at a point south of the township of Bucke, of some remarkably rich deposits of cobalt-nickel arsenides and silver ores. The association of these minerals on a commercial scale is something new in this Province, and if the finds prove to be extensive, they will be of much importance. A typical analysis showed the presence of 16.76 per cent. cobalt, 6.24 per cent. nickel, and 66.60 per cent. arsenic. Native silver was very abundant in one or two of the veins, some specimens containing as high as 26.24 per cent. The advent of winter, however, prevented development work on a large scale, and rendered further prospecting impracticable. It is therefore impossible to say whether other similar veins or bodies exist, but the slate or slate-breccia formation which here carries the minerals is found over wisespread areas in the neighborhood and east of Lake Temagami. A belt of land ten miles in width, on both sides of the railway, has been for the present withdrawn from sale.

The output of iron ore during the year was 208,154 tons, valued at $450,-

099. This yield is less than that of 1902, the reduction being due to the closing of the Helen mine in Michipicoten, caused by the financial difficulties in which the Lake Superior Power Company became involved. The search for new iron ore fields and deposits went on actively during the year. The magnetite range in and west of the Township of Hutton was closely investigated by representatives of American capitalists, who also carefully scrutinized the ranges on the northeast arm and elsewhere on Lake Temagami. The deposits in Hutton are believed to be of large size and much importance, and it is understood the Canadian Pacific Railway Company has surveyed a route to them from Sudbury, which will also cross the northern nickel range at about half way. At Loon Lake, east of Port Arthur, diamond drill borings have located a considerable body of hematite, and in the Township of Boston, in the valley of the Blanch River, prospectors have reported the existence of iron-bearing rocks with strong indications of ore bodies.

The production of pig iron during 1903 was 87,004 tons, worth $1,491,696, the ore smelted being 48,092 tons taken from Ontario mines, and 103,137 tons imported from the United States. Steel was made to the extent of 15,229 tons valued at $304,580.

Mining for the precious metals was less active last year than usual. The yield of gold was 10,383 ounces worth $188,936, and of silver 16,688 ounces, worth $8,949.

COLLECTIONS.

The total collections of the Department from all sources under its control were $2,459,110.86. Of this, $147,014.05 was derived from sales and leases of Crown lands, $2,307,356.12 from timber, and $4,740.69 from miscellaneous. (See appendix No. 4, page 6).

DISBURSEMENTS.

The total disbursements of the Department were $351,011.28. This includes Agents' salaries, $28,964.51; Forest ranging, $41,305.74; Fire ranging, $31,237.86; Mining development, $12,528.86; Surveys, $80,777.73; Refunds, $54,000.76. It also covers $57,623.17 special services under direction of Department, such as Immigration and Colonization $16,863.47, Diamond drills $3,791, Iron Mining Fund $25,000, Parks $10,890.16. (See appendices Nos. 6 and 7, pages 8 to 21).

WOODS AND FORESTS.

The total revenue collected from this source was $2,307,356.12. Of this, $1,340,696.76 was on account of bonus, $901,744.26 on account of timber dues, $63,057.85 on account of ground rent, and $1,857.25 transfer fees. (See appendix No. 4, page 6).

The lumber trade has been in a very prosperous state during the past year, and so far as can be seen from the present outlook, the coming season is likely to be equally prosperous. It having been considered expedient, owing to the construction of the Temiskaming & Northern Ontario Railway, to dispose of certain timber lands lying along its route, so that the value of the timber might be obtained for the Province, and that the land might in the future be available for disposition, it was determined to hold a sale of timber berths. Advantage was taken of the holding of this sale to include in it certain timber areas north of Sudbury, where mining discoveries on an extensive scale had been made, and also to include in it certain small berths in the Rainy River district, where the timber was exposed to fire and trespass. It appearing that the time had come when a considerable increase might be made in the timber dues and ground rent, so as to augment the annual income from these sources, the timber dues for the purposes of this sale were increased from $1.00 or $1.25 to $2 per 1,000 feet board measure on saw logs; from $20 or $25 to $50 per thousand feet cubic on square timber; and the ground rent was increased from $3 per square mile to $5. So far as the berths in the older part of the Province were concerned, the sale covered the right to cut the red and white pine only. In some of the berths in the Rainy River district the same restriction applied, while in others where there was considerable quantity of timber suitable for ties, the timber other than pine was also included in the sale. The time to remove the timber was fixed at fifteen years, in order not to force the licensees to cut the timber away too rapidly. The sale was advertised for about four months and a half in all the leading newspapers in the Province and the principal lumbering journals in the United States, and in addition circulars were sent to all those engaged in the lumber business in Canada. The conditions of sale, maps and all other necessary information were forwarded at the same time. From the correspondence that began to pour in as soon as the sale was advertised, it became evident that it would be eminently successful, but it was scarcely anticipated that the prices paid would be so satisfactory, the fear being that the substantial increase in dues and ground rent would cut down the bonus price. The sale was held on 9th December inst., and the attendance of lumbermen and others interested in that business was thoroughly representative, perhaps the largest in the history of the timber sales of this Department. There were sold 826½ square miles, and the amount realized as bonus was $3,687,337.50, or an average of $4,461.38 per mile. The highest price paid per mile was $31,500, for a small berth in the township of Hammell. One of the most satisfactory features of this sale was the great advance in the stumpage value of timber in the Rainy River district, as it was thereby established that our timber resources in that region were becoming of equal value as regards stumpage to those which lie tributary to Lake Huron. The great increase in the stumpage value in the Rainy River district has come about through the rapid settlement of the western prairies, which has opened up a large market for sawn timber, and no doubt, as that region becomes more densely populated, the value of timber in the Rainy River district will still further increase. There was paid into the Department on account of this sale $1,325,838.25, leaving outstanding $2,361,499.25 to be collected.

The result of the sale has been to establish a new record value for our pine timber, which has become an immensely valuable asset, capable of providing a large revenue for public purposes for very many years to come, if it is carefully guarded from fire and disposed of from time to time in reasonable areas.

The wisdom of setting apart as forest reserves areas which contain large bodies of timber, with the object of preserving the forest wealth therein, and protecting it, must be manifest to everybody. In pursuance of this policy the Temagaming Forest Reserve has been enlarged by including in its boundaries some 3,700 square miles lying to the north and west of the former reserve. It is also proposed to form a new and extensive reserve on the Mississaga River, in the District of Algoma, where there is an immense body of pine timber on lands unsuitable for agriculture. This reserve will cover some 3,000 square miles.

Attention is called to the fact that in estimating the forest resources of the Province the practice heretofore has been to take into consideration the pine only, but those who have observed the great increase in value which hardwoods and certain soft woods have taken on recently must be impressed with the fact that in these timbers also there is an enormous source of future revenue. In some of our forest reserves and parks in a short time there will be timber requiring to be cut, which will not only wipe out all expenses that have been incurred in creating and protecting them, but bring in to the Province a substantial annual income.

There are now at Rainy River town, in the District of Rainy River, two large saw mills, capable of cutting 80,000,000 feet board measure per annum of sawed lumber. The larger and more recently erected of these mills is intended to cut timber owned in the State of Minnesota, and to draw a part of its supply from the Province of Ontario, but all the labor and occupancy of capital in connection with both mills inures to the benefit of the Province.

PULP WOOD.

The Sault Ste. Marie Pulp and Paper Company took out considerable quantities of pulp wood last winter, but owing to the unfortunate financial condition into which the affairs of this company have fallen, the pulp mills as well as the other industries were shut down for a considerable period. The Receiver has been operating the pulp mills since the beginning of November, and using up the wood taken out by the company last winter.

The Sturgeon Falls Pulp Company has completed its new mills, and carried out to the full its contract with the Government, and has now in operation an extensive plant, capable of turning out from 40 to 50 tons of newspaper per diem. This company is taking out during the present winter a large supply of pulp wood.

The Spanish River Pulp and Paper Company has the construction of its plant sufficiently well advanced to warrant it in taking out a supply of pulp wood during the present winter.

The Nepigon Pulp and Paper Company proposes to proceed with the erection of its mills on the opening of navigation.

The Rainy River Pulp Company has had plans prepared, and is about to construct its dam at Sand Island Falls, on the Seine River, where it proposes to develop some 10,000 horse power.

The Montreal Pulp and Paper Company has not yet proceeded with active development.

The territory covered by the Blanch River pulp concession having been almost entirely settled up, the benefit of the pulp wood upon the lands will inure to the settlers instead of to the Crown. This company, however, has not yet erected its mills.

FIRE RANGING.

There was a staff of 270 fire rangers on duty during the past summer, some 244 being on licensed territory, where through settlement, mining development, tourist travel, etc., there is most danger. Twenty-six rangers were on duty on lands of the Crown, some along the construction of the Temiskaming Railway, others on the main arteries of water travel north, and some in the Rainy River district. The summer, speaking generally was wet, and so the number of fires was not large nor was there any serious damage done. The most exposed area of Crown lands was, of course, along the line of construction of the Temiskaming Railway, and here the supervision was very close and every precaution possible was taken. The Department entered into arrangements with the Temiskaming Railway Commission, by which it was agreed that in the event of fire occurring all the employees of the Commission and the contractors and sub-contractors and others were bound to turn out and assist the fire rangers in suppressing it. The Railway Commission agreed to bear half the wages and expenses of the rangers, cost of suppressing fire, etc. Some fires occurred along the line of construction, but owing to the close supervision which existed, assistance was called out and they were extinguished without doing any serious damage. It is satisfactory to be able to state as a result of the active assistance rendered by the Railway Commission, and the careful supervision of the fire rangers on duty there that no damage worth mentioning has occurred, although the railway was being actively constructed during the whole of the summer.

During the year cullers' examinations were held at Huntsville and Rat Portage, at which 49 candidates were found qualified and granted certificates authorizing them to act as cullers.

The Provincial Parks.

The reports of the Superintendents of Algonquin National Park and Rondeau Provincial Park will be found in appendices Nos. 38 and 39 respectively pages 66, 67 and 68.

Crown Surveys.

The following Crown surveys have been carried out this year:—

The line between the Districts of Algoma and Thunder Bay, on the line of longitude 85 degrees 20 minutes west from Greenwich, being the limit between the said judicial districts under the provisions of the Statutes of Ontario, 1 Edward VII., chapter 12, section 10, has been completed, thus establishing the line from the Canadian Pacific Railway south to Lake Superior.

A number of base and meridian lines in the Districts of Algoma and Nipissing have also been run. The meridian line in the District of Thunder Bay, from the north boundary of the township of Dorion to the shore of McIntyre Bay of Lake Nepigon has also been run. In the District of Algoma, the townships of Whitney and Tisdale have been subdivided into farm lots of 320 acres each. In the District of Nipissing, the townships of Barber, James, Coulson, Wilkie, Currie, Evelyn, Milligan, Walker, Auld, Burt and Holmes have been subdivided into lots of 320 acres each. In the District of Thunder Bay, the township of Innes has been subdivided into lots of 320 acres each, and in the District of Rainy River the townships of Britton, Richardson, Potts, Tovell and Dewart have also been subdivided into lots of 320 acres each.

A number of timber berths in the Districts of Rainy River, Algoma and Nipissing were surveyed. Several other minor surveys have been performed during the year.

Owing to the late date at which the necessary appropriations were made by the Legislature, sufficient time did not remain for the completion of the surveys for which instructions were issued. Consequently, many of the surveyors were unable to finish their contracts, which will have to be carried out next season.

The surveyors' reports so far as received and examined will be found in appendices 18 to 37 inclusive, pages 33 to 66 inclusive.

MUNICIPAL SURVEYS.

The Department has during the year, on the petitions of the municipalities of the County of Huron, County of Perth, townships of Hinchinbrooke, Ross, Logan, McKillop and Pickering, issued instructions for the survey of portions of townships within said municipalities, namely, the line between the 2nd and 3rd concessions of the townships of Hinchinbrooke, in the County of Frontenac, across lot 24; the line between the 5th and 6th concessions of Hinchinbrooke, from lot 25 southerly to lot No. 11; the road allowance between lots Nos. 5 and 6, from concession No. 3 to concession No. 8 inclusive, in the township of Ross, in the County of Renfrew; the town line between the Township of Logan, in the County of Perth and the township of McKillop, in the County of Huron, from the front of the 13th concession of each township northerly to the north town line; in the township of Pickering, in the County of Ontario, the original road allowance between lots 16 and 17 in the 3rd concession.

The following municipal surveys have been confirmed during the year under the provisions of the Revised Statutes of Ontario, 1897, chapter 181, sections 14 and 15, such surveys so confirmed being final and conclusive: The allowance for road between the 3rd and 4th concessions of the township of Douro, in the County of Peterborough, north of lot No. 23, and extending to the River Otonabee; certain streets in the village of Port Credit, and lying on the east side of the River Credit, in the township of Toronto, in the County of Peel, and also the road allowance between Dundas street and the 1st concession south of Dundas street, on the Indian Reserve in the said township of Toronto, from the westerly limit of lot No. 12 to the easterly limit of lot No. 15; the allowance for road between the 8th and 9th concessions of the township of Ross, in the County of Renfrew, from lot No. 1 to lot No. 5 inclusive; the concession road allowance between the 9th and 10th concessions of the township of Fitzroy, in the County of Carleton, from side road allowance between lots Nos. 5 and 6 to side road allowance, between lots Nos. 10 and 11; side road allowance between lots Nos. 5 and 6 in the 5th concession of the township of East Gwillimbury, in the County of York, and the allowance for road between lots Nos. 30 and 31 in the 7th concession of the said township of East Gwillimbury.

The particulars relating to these surveys will be found in appendices 14 and 15, pages 29 to 31 inclusive.

MINING AND OTHER SURVEYS.

The Mines Act of 1897, and amendments thereto require that applicants to purchase or lease mining lands in unsurveyed territory shall file in the Department surveyor's plans (in duplicate) of their proposed mining locations, with field notes and descriptions by metes and bounds, before any sale or lease can be carried out, and under Orders-in-Council, dated 23rd of January, 1892; 3rd December, 1892; 29th April, 1886; and 22nd September, 1893, applicants to purchase islands or locations for agricultural purposes in unsurveyed territory are required to file surveyor's plans (in duplicate) of their location, with field notes and descriptions by metes and bounds; the locations to be of the form and size, wherever practicable, prescribed by the Mines Act, together with the necessary affidavits.

Under the above act and regulations, in the Districts of Parry Sound, Nipissing, Algoma, Rainy River and Thunder Bay, an area of 10,784 acres has been sold and patented during the year, for which the sum of $17,973.50

has been received; and an area of 19,373 3-10 acres has been leased at $1 per acre for the first year's rental.

IMMIGRATION.

The immigration work of the Bureau of Colonization during the past year has been unusually successful. Owing to the movement of farmer's sons, farm laborers and renters to New Ontario and the Northwest in 1901 and 1902, there was a very great scarcity of farm labor in the older part of the Province, and appeals to the Bureau for help became very insistent.

In consequence of these urgent demands, request was made of both our own Agent in Liverpool and the Dominion Emigration Commissioner in London for an increased emigration from the United Kingdom of men willing to engage in farm work. While experienced farm laborers were particularly desired, inexperienced men who were desirous of learning the business were readily employed. In March, in response to the general appeals throughout the Province for labor, Mr. H. E. Kyle of Oakville, an English gentleman who had been for some years resident in Canada, engaged in farming, was commissioned to proceed to England, and, acting in conjunction with Mr. Byrne, the Ontario Agent at Liverpool, to secure as many farm laborers as possible for service in this Province. Mr. Kyle's visit was so late in the year that most of the experienced farm laborers had made their arrangements for the season, although he succeeded in sending direct to our officers at the Union Station here over 100 men, quite a number of whom had families. These men appeared to have been very carefully selected by Mr. Kyle, and have for the most part gven excellent satisfaction to the farmers with whom they secured situations.

Mr. Kyle's work was so effective that it was deemed advisable to send him back, and he made another trip to England in December. From reports already received from him, there is no doubt that his work this season will be eminently successful.

In addition to the work of Mr. Kyle and of Mr. Byrne, our regular Agent in Liverpool, we had, although a little late in the season, the active co-operation of the Dominion authorities, so that while we were unable to supply the demands from our farmers for help, we succeeded in placing a considerable number of farm laborers who were sent direct to farmers applying for them.

In the winter of 1902-3 I gave directions for the thorough organization of a Bureau of Farm Labor. Blanks were distributed throughout the Province, largely through the agency of the Secretaries of the various Farmers' Institutes, to be filled in by farmers and returned to us, stating their requirements in the matter of help for the season. The farmers were required to state the kind of help they desired, whether they could only use experienced farm laborers, or inexperienced help at lower wages, or whether they were prepared to take a young Englishman of the better class, who desired to learn farming as it is conducted in this country. A considerable number of this latter class came out during the year, and were in most cases satisfactorily placed. These young men are mostly of good families in the old country, and will have an amount of capital with which to buy property when they have mastered the details of the business.

The applications from farmers for farm labor are filed in our Bureau, and on the arrival of emigrants at the Union Station, the officers there endeavor to select men suitable for the post, and they are despatched at once to the men applying for their services, with a letter of introduction from our officers.

In addition to the men sent directly by us, so great was the demand for labor this year that a great many farmers within easy reach of Toronto visited the Union Station on the days when immigrants were expected to arrive, and large numbers of them were engaged directly without reporting to the Bureau. For this reason it is impossible to give correct figures as to the number of farm laborers distributed during the year.

Of the total immigration arriving in the Province, a certain proportion go direct to relatives and friends living here, others come out after having practically secured positions before leaving the old country, and these go direct to their places of employment without reporting to our office. Of the others, on their being met at the train by our officials, as many of them as possible are persuaded to take farm work. Those who are not willing to do this are allowed to follow their own inclinations, our officials merely furnishing them with the names of firms in Toronto and elsewhere employing men in their line of work.

E. J. DAVIS,
Commissioner.

Department of Crown Lands, December 31, 1903.

APPENDICES.

Appendix No. 1.

Return of Officers and Clerks of the Department of Crown Lands for the year 1903.

Branch.	Name.	Designation.	When appointed.	Salary per annum.	Remarks.
	Hon. E. J. Davis	Commissioner	1889 Oct. 21	$4,000

(*Appendix No.* 14.)

Statement of Municipal Surveys for which instructions were issued during the year 1903.

No.	Name of Surveyor.	No.	Date of Instructions.	Description of survey.	Date when confirmed under R.S.O., 1897, cap. 181, sec. 14, sub-sec. 4.
1	E. T. Wilkie....	643	February 27th..	To survey the line between the 2nd and 3rd concession of the Township of Hinchinbrooke across lot 24, and to define the same by permanent stone or other durable monuments.	
2	James L. Morris	644	May 2nd	To survey the road allowance between lots Nos. 5 and 6, from concession No. 3 to concession No. 8, both inclusive, in the Township of Ross, in the County of Renfrew, and to mark the same by permanent monuments on either side thereof.	
3	James A. Bell.	645	August 12th .	To survey the town line between the Township of Logan, in the County of Perth, and the Township of McKillop, in the County of Huron, from the front of the 13th concession of each of said townships northerly to the north town line of the townships, and to mark said portion of town line by durable monuments at the angles of the concession road allowances abutting on the said town line in the Townships of McKillop and Logan.	
4	E. T. Wilkie	646	August 31st .	To survey that part of the line between the 5th and 6th concessions of the Township of Hinchinbrooke, from lot 25 southerly to lot No. 11, inclusive, and to mark the same by permanent monuments at the angles of the lots on each side of the concession road allowance between the above concessions.	
5	W. E. Yarnold .	647	November 3rd.	To survey the original road allowance between lots 16 and 17, in the 3rd concession of the Township of Pickering, in the County of Ontario, and to mark the same by permanent monuments of stone or iron planted on each side of the allowance for road so as to define the limits of the above lots.	

GEO. B. KIRKPATRICK,
Director of Surveys.

AUBREY WHITE,
Assistant Commissioner.

(*Appendix No.* 15.)

Statement of municipal surveys confirmed during the year 1903.

No.	Name of Surveyor.	No.	Date of Instruction.	Description of Survey.	Date when confirmed under R.S.O., 1897, Cap. 181, s. 14, S. S. 4.
1	Alf. J. Cameron	619	October 7, 1899	To survey and determine by permanent stone or iron monuments, planted on each side thereof; the allowance for road between the third and fourth concessions of the Township of Douro, north of lot number twenty-three and extending to the River Otonabee, the survey to commence at the undisputed corner between lots numbers thirteen and fourteen on the said concession road allowance between the said third and fourth concessions.	July 3rd, 1903
2	H. H. Gibson	638	July 7, 1902	To survey and establish Queen street, Ann street, Hurontario street, Helen street, Brook street, Park street, High street, Port street, Toronto street, and Elizabeth street, said streets being east of the River Credit, in the Village of Port Credit, in the Township of Toronto, in the County of Peel, by planting stone or other durable monuments at the intersections of the said streets at the respective corners of the lots abutting thereon, and also for the survey of the road allowance between Dundas Street and the first concession south of Dundas Street on the Indian Reserve in the said Township of Toronto, from the westerly limit of lot number twelve to the easterly limit of lot number fifteen, in said Township of Toronto, and to mark same by permanent stone or other durable monuments.	November 18, '03.
3	Jas. L. Morris	641	October 28, 1902	To survey the allowance for road between the eighth and ninth concessions of the Township of Ross from lot number one to lot number five inclusive, and to mark the same by permanent stone or other durable monuments on either side thereof.	September 14, '03
4	Jas. L. Morris	42	December 9, '02	To survey the concession road allowance between the ninth and tenth concessions of the Township of Fitzroy, in the County of Carleton, from side road allowance between lots numbers five and six to side road allowance between lots numbers ten and eleven, and to plant stone or other durable monuments at the angles of the lots on either side of said concession road allowance between the said side roads.	October 7, 1903

(*Appendix No.* 18.)

SURVEY OF THE LINE BETWEEN THE PROVISIONAL JUDICIAL DISTRICTS OF ALGOMA AND THUNDER BAY.

Toronto, June 27th, 1903.

SIR,—I have the honor to submit the following report on the survey of the limit between the Provisional Judicial Districts of Algoma and Thunder Bay, from its intersection with the Canadian Pacific Railway due south to the waters of Lake Superior, performed by me under instructions from your Department, dated sixth October, nineteen hundred and two.

As set forth in the instructions, the limit between these districts was required to be the meridian of eighty-five degrees and twenty minutes west longitude under the provisions of the Statutes of Ontario, First Edward the Seventh, Chapter twelve, Section Two; and an observing pier had been established at White River by the Department of the Interior, in longitude eighty-five degrees, sixteen minutes, fifty-four .735 seconds west, and latitude forty-eight degrees, thirty-five minutes, nine seconds north.

Having organized the necessary party, I began the work of the twenty-first October, 1902, by taking an astronomical observation at the observing pier mentioned, and ran thence due west two miles, twenty-eight chains and seventy-five links, that being the lineal distance to the meridian of eighty-five degrees and twenty minutes west longitude. I then ran due north along the meridian to the centre line of the right of way of the Canadian Pacific Railway, at a point nine chains and fifty-five links westerly from the seven hundred and fifty mile board, and, as a check, traversed eastward along the railway to the observing pier.

By latitudes and departures this distance was found to agree within four links with the theoretical distance first measured.

Owing to the lateness of the season, and the consequent necessity of pressing the work forward as rapidly as possible, I arranged with a reliable local merchant to transport supplies for the south half of the work to a point on Iron Lake, and proceeded without delay with the work in hand.

The survey of the line proper was begun at the intersection of the meridian above referred to with the centre line of the Canadian Pacific Railway, and was carried due south astronomically for about twenty-five miles. Upon nearing Iron Lake I sent messengers across for provisions, but they found that the freighters had failed to reach the place agreed upon. We then continued the line as far as our remaining supplies would permit, reaching the middle of the twenty-sixth mile, at which point we were obliged to cache our outfit, abandon the work for the season, and return overland to White River. We there learned, that the freighters had taken the supplies only about half way to Iron Lake, when the closing of the canoe route by ice caused them to fail in the fulfillment of their agreement.

The uncertainty of the time that would elapse before the permanent opening of winter travel, and the expense of maintaining the party in idleness during the interval, together with the prospect of a considerable outlay for a winter outfit, determined me to postpone the completion of the work until spring.

Upon the opening of canoe navigation in May of this year I returned to White River, and, having obtained the necessary men, set out on the eighteenth of the month to resume the survey.

Following the summer route up White River, through Pokay Lake, across the divide and down the waters of Dog River, through McMaster, University, Obatonga, Knife and Iron Lakes, we reached the supply depot, to which the freighters had forwarded the delayed provisions during the winter.

The survey was then continued and the line extended due south to Lake Superior, a total length of about forty-five and three quarter miles, by thirteenth June.

By previous arrangement with the Dominion Fish Company, Captain Ganley of the steamer Hiram H. Dixon was on the lookout for our party, and picked us up in passing on the following morning, on his way to Sault Ste. Marie.

Arrived at that point, the party was disbanded, upon which I returned to White River, via Port Coldwell, and, having closed up affairs, set out for Toronto.

In running the line above referred to, the centre line of the right of way of the Canadian Pacific Railway was made the initial point, and a post was planted on the district line at the distance of one hundred feet south, measured on a course at right angles to the centre line of the railway.

Except where such point occurred in a lake or river, a wooden post was planted at the end of every mile, and an iron post three feet long and one and seven-eighth inches in diameter at the end of every third mile, the number of the mile being marked on the north side, with the words "Algoma" on the east and "Thunder Bay" on the west, respectively, in each case. The wooden posts were made of the most durable material to be found in the vicinity, and wherever practicable, mounds of stones were erected about the posts, and bearing trees marked and noted in the usual manner.

Where a mile terminated in a lake, the post was planted on the line on the nearest land, and marked with the number of the next mile preceding, plus the distance from such mile.

Frequent astronomical observations were taken to verify the course of the line run. The magnetic declination was noted throughout, and varied from one degree thirty minutes to two degrees thirty minutes, west.

We were unable to find any trace of Herrick's line referred to in the instructions.

Slight traces of the boundaries of mining locations A and B were seen about three-quarters of a mile east of our line, and one-quarter of a mile north of Lake Superior, but not enough to accurately locate them. They are, however, well to the east of the district line.

PHYSICAL FEATURES.

The country crossed by the first twenty-four miles of the line is rocky and rolling, with no eminences of greater altitude than one hundred feet above the surrounding lands. The remainder of the line crossed hilly country, verging to mountainous, as Lake Superior was approached, the aneroid indicating a difference in altitude of seven hundred and fifty feet between the summits of the highest hills on the line and the lake. To the west of the forty-fourth mile a bare hill attaining an altitude of at least nine hundred feet was seen. No large lakes were encountered, but the country is fairly well watered by small lakes and streams. Few of the streams have sufficient volume for driving timber, and those which may be large enough for that purpose have in nearly all cases too great fall to be of service in that respect.

Soil.

There is no agricurtural future for this region, as rock and sandy soil predominate.

Timber.

In the first twenty-four miles the timber is chiefly green Banksian pine, spruce, white birch, tamarac, balsam and poplar, the first named three varieties being of fair quality, and but for the difficulty of taking out would form an asset of considerable value. Small burnt areas occur at intervals. From the twenty-fourth to the thirty-seventh mile the timber is mainly spruce, white birch, balsam and tamarac, the maximum diameter being about fifteen inches. Throughout the remainder of the distance white birch predominates, with spruce, balsam and poplar following in the above order. The maximum size of white birch in this part is twenty inches.

Minerals.

The number of mining locations already taken up, and the development work done, stamp this as a region of much promise of value to the iron industries of the Province.

Frequent outcroppings of hematite were seen, particularly in the vicinity of Iron Lake, and samples of ore are transmitted herewith. The Laurentian formation extends from the railway down to the middle of the twenty-fifth mile, when the Huronian begins and continues to the end of the forty-second mile. The remainder of the distance to the lake is an alteration of those formations.

Game and Fish.

We saw very few indications of game, other than an abundance of rabbits, and fish of all kinds are rare.

Accompanying this report are a general plan, field notes, record of aneroid readings, diary, photographs, and triplicate accounts.

I have the honor to be, sir,

Your obedient servant,
(Signed) T. B. SPEIGHT,
Ontario Land Surveyor.

Hon. E. J. Davis, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 19.)

SURVEY OF BASE AND MERIDIAN LINES, DISTRICTS OF ALGOMA AND NIPISSING.

Toronto, 10th December, 1903.

Sir,—I have the honor to submit the following report on the survey of certain base and meridian lines in the Districts of Algoma and Nipissing, made by me during the past summer, under instructions from your Department, dated twenty-fifth of June, nineteen hundred and three.

I left Toronto with five members of my party on the twenty-ninth of June, and proceeded to Metagami Station, on the Canadian Pacific Railway, where, by previous arrangement, I was joined by eleven others from various points along the railway and north shore of Lake Huron.

Taking a considerable part of the season's supplies in five canoes, we started up the Hudson's Bay canoe route on second July, leaving the remainder of the provision to be brought in by freighters.

Reaching Fort Mattagami on sixth July, we continued the journey without interruption to where the route is joined by the canoe route from Night Hawk Lake, at which point we arrived on ninth July, and made preparations for the commencement of the survey.

On tenth July I began the meridian line, forming the west boundaries of the townships of Tisdale and Murphy, at the end of the twelfth mile of the base line run by Ontario Land Surveyor Niven west, from the one hundred and twentieth mile on the District line between Nipissing and Algoma.

This starting point is defined by a spruce post and by an iron post three feet long and one and one-quarter inches in diameter, marked by Mr. Niven, "XII. M." on the east side, and by myself, "Tisdale," on the northeast side.

From it I ran due north astronomically twelve miles, and planted at the end of every mile a wooden post of the most durable material available, and, in addition, at the third and ninth miles, iron posts three feet long and one and one-quarter inches in diameter, while at the ends of the sixth and twelfth miles I planted iron posts three feet long and one and seven-eights inches in diameter.

All these iron posts were marked on the south sides with the number of miles from the initial point, and on the proper sides the names of the respective townships.

At the end of the twelfth mile I ran east on two six mile chords of the parallel of latitude, being along the north boundaries of the townships of Murphy and Hoyle to intersect the District boundary, planting marked posts similar to those above described.

I then proceeded south to the one hundred and twenty-sixth mile on the District boundary, which point is defined by a tamarac post and an iron post one and one-quarter inches in diameter, marked "CXXVI.M.," to which I added the names of the four adjoining townships on the respective sides.

From this post I ran the base line east, on six mile chords of the parallel of latitude, a distance of thirty-six miles, and then continued the last chord a further distance of fifty-two chains and seventy-four links to intersect the meridian line run by me in the year nineteen hundred and two, from the northwest angle of the township of Eby. This base line forms the north boundaries of the townships of Cody, Macklem, Bond, Currie, Bowman and Hislop, and the south boundaries of the townships of Matheson, German, Stock, Taylor, Carr and Beatty.

Upon crossing the meridians previously run south by Ontario Land Surveyor Patten near the twelfth and twenty-fourth mile posts on this base line, I moved the posts temporarily left by Mr. Patten to the respective intersection points, and there planted them, noting the "jogs" occasioned thereby.

At the ends of the twelfth and twenty-fourth miles respectively I ran due south astronomically to intersect the base line run by Ontario Land Surveyor Galbraith. Arriving at the junction point in the first instance before Mr. Galbraith had reached it, I left the iron and wooden posts temporarily at the net distance for the twelfth mile. In the second case I removed he posts left temporarily by Mr. Galbraith to the point where my meridian intersected his base line.

The first of these meridians in the District of Nipissing forms the east boundaries of the townships of Macklem and Thomas and the west boundaries of the townships of Bond and Sheraton; the second forming the east boundaries of the townships of Currie and Egan, and the west boundaries of the townships of Bowman and McCann,

I planted a wooden post at the end of every mile—except where such terminated in a lake or river—throughout the whole courses of the base and meridain lines run by me, and at every third and sixth mile of every township boundary an iron post of the dimensions and suitable markings described in reference to the first twelve miles of the work .

The exceptionally wet and cloudy weather made it impossible to get astronomical observations as frequently as I have usually done on this class of work, but the observations obtained verified in every instance the course of the line in progress.

The magnetic variation was generally uniform at eight degrees in the western part of the work and increasing to eleven degress west in the eastern part, with no marked local attraction at any point.

GENERAL FEATURES.

All the country except that in the vicinity of the Black River, and along the centre part of the east meridian, touched by this survey is level or undulating, the remainder being rolling land. No lakes of any large extent were crossed by the lines, and the large swamps shown in the accompanying field notes are doubtless in a measure due to the unusual railfall. A normal season may reduce these areas by a considerable extent.

SOIL.

The soil in general is good clay and clay loam, fully seventy-five per cent. being capable of being converted into farm land. Along the west and north boundaries of the township of Murphy, the north boundaries of Hoyle, Cody, Macklem, Currie, Bowman and the west part of Hislop the best soil is found. Sandy, and, in places, rocky, land prevails along the south part of the west boundary of Tisdale, the adjoining halves of the west boundaries of Bond and Sheraton, and the south part of the west boundary of Bowman. The clay land referred to is, in places, wet and swampy, but good drainage can for the most part be readily found.

The canoe route from Macdougal's clearing—situated on the north boundary of the township of Bowman—to Fort Matachewan, which passes through the east halves of Bowman and McCann, enters a stretch of sandy plains, broken by numerous lakes, at about three miles south from the north boundary of Bowman. This area extends for at least four miles southward, and may continue further, but our observation did not extend below that point.

The productiveness of the soil in general was fully evidenced by the luxuriant yields of small fruits, such as raspberries, currants, etc.

TIMBER.

Spruce, poplar, tamarac (chiefly dead), balsam, balm of Gilead, with birch and Banksian pine comprise the varieties of timber met with, and in the above order of predominance. That in valleys of the larger rivers is of good quality, but in the parts remote from streams it is usually of too small growth to be valuable for lumber. Between Night Hawk Lake and Porcupine River there is a large quantity of poplar suitable for lumber, many of the trees attaining a diameter of thirty inches. Large quantities of pulpwood will eventually be obtained from this region, unless destroyed by fire before becoming accessible.

MINERALS.

The only outcroppings or rock seen were of Huronian formation, and occurred near the southwest angle of the township of Tisdale, and near the southwest angle of the Township of Bowman, also about the various falls on Black River. No indications of economic minerals were met with. A general examination of the geological features of the country having been made during this season by Mr. G. F. Kay for the Bureau of Mines, the report thereon will supply more detailed information.

WATER.

Night Hawk Lake, already described in previous surveyor's reports, and Moose Lake are the only lakes of importance encountered. The latter, which is situated on the northern half of the township of Bond, is about two miles long by one mile broad, with low-lying shores. Its depth does not exceed ten feet, and, like all bodies of water in the clay belt, its waters are so impregnated with clay as to be opaque.

Mattagami River is a stream about three chains in width, with clay banks about ten to fifteen feet high, and has a depth of ten feet in many places, with a rapid current. It flows northerly about three quarters of a mile west of the township of Tisdale.

The Porcupine River takes its rise in Porcupine Lake, near the southwest angle of the township of Whitney, and, flowing northerly, easterly and southerly through the townships of Whitney, Hoyle, Matheson and Cody, empties into the northwesterly angle of Night Hawk Lake. Its breadth at the crossing of the north boundary of the township of Hoyle, after having been joined by the northwest branch, is one and one-half chains, with depth of about eight feet, and moderate current. The height of its bank varies from ten to twenty feet.

Frederick House River flows from Night Hawk Lake northerly into Frederick House Lake, in the township of Matheson, and thence northerly to Abitibi River. It is a fine stream, from three to five chains in width, with a depth of about ten feet and upwards, and moderate current.

Rising in Moose Lake, the Driftwood River flows northerly through the townships of Bond, Stock, Clergue and Walker, and empties into the Black River a short distance below the confluence of that stream with the Abitibi River. Driftwood River has an average breadth of about one chain and a depth of six feet, with banks about ten feet in height. Several rapids and log jams render portages necessary.

The Black River enters the township of Playfair, and, flowing northwesterly through Playfair, Hislop, Bowman, Carr, Taylor and Walker, empties into Abitibi River near the north boundary of the township last named. It it a fine stream of from two to three chains in width, with depth of from four to ten feet, and moderate current, and no rapids or falls from Macdougall's clearing to its mouth. From the east boundary of the township of Playfair to Macdougall's clearing there are at least four good falls, available for water powers.

The volumes of the rivers as above noted are subject to reductions in normal seasons.

GAME AND FISH.

Moose, bear and beaver are plentiful. Occasional red deer and caribou, mink and marten were seen.

Pike and pickerel are abundant in the larger lakes, but few were noticed in the other waters.

Making due allowance for the unfavorable circumstances arising from the unusual season, I am satisfied that there is a bright future in store for the greater part of the region above described, both as regards timber and agriculture. This, however, owing to the isolated position of the district, will not arrive until railway facilities are provided.

By the best canoe route a distance of about seventy-five miles, including not less than fifty portages, must be traversed before the first settlement—at Tomstown, in the township of Ingram—is reached.

In returning, after the completion of the survey, we left on the 28th September, and followed the canoe route up the Black River to its junction with White Clay River, up which we travelled to the height of land, crossing thence to the Blanch River waters. Proceeding down the Blanch, we reached Tomstown on 1st October, and New Liskeard on the evening of the same day. A delay of thirty-six hours in steamboat connection occurred here, after which we continued our journey to Mattawa, which point was reached on third October.

Accompanying this report are general plan and field notes.

I have the honor to be, sir,
Your obedient servant,
(Signed) T. B. SPEIGHT,
Ontario Land Surveyor.

HON E. J. DAVIS, Commissioner Crown Lands, Toronto.

(Appendix No. 20.)

SURVEY OF BASE AND MERIDIAN LINES, DISTRICT OF NIPISSING.

Bracebridge, Ont., November 7th, 1903.

SIR,—I have the honor to submit the following report on the survey of base and meridian lines in the District of Nipissing, under instructions from your Department, dated the seventh day of July, A.D., nineteen hundred and three.

I proceeded to Sturgeon Falls and Sudbury, where men, canoes and supplies were procured, and from there by rail to Metagami, a station on the Canadian Pacific Railway, where the canoes were launched in the small stream leading northerly on the twenty-second of July, and after a journey of considerable length I arrived at the south bay of Night Hawk Lake with the greater part of my supplies, on the seventh day of August.

Commencing the survey at the one hundred and fourteenth mile post on the district line between Algoma and Nipissing, I ran the base line twelve miles east to the intersection of Mr. T. B. Speight's first meridian. I ran this meridian south a distance of two miles and sixty-seven chains, and thence continued the base line east, reaching the southeast angle of the township of Egan on the fifth day of September, where I found that Mr. T. B. Speight, Ontario Land Surveyor, had not yet reached this point with the second meridian.

After surveying part of the township of Sheraton during the balance of September, in which month the low land was continually flooded by the unusual amount of railfall, I was unable to hold a sufficient number of men to complete the work, and returned via the Montreal River and Haileybury, arriving at the latter place on the seventh day of October.

West of Night Hawk Lake the base line runs through a fairly level country, with a few ridges of Huronian rock. There are some large areas of low land that are quite wet, but when opened up and drained there would be a considerable percentage of agricultural land.

East from Night Hawk Lake to the sixth mile is good agricultural land, with deep clay loam and clay soil; this is well timbered with spruce, balsam, poplar, white birch and cedar, from six inches to fifteen inches in diameter.

Along the line between the townships of Thomas and Blackstock the land is low and wet, with much fallen tamarac. These trees have been killed some years ago, and every storm causes numbers of them to fall to the ground, blocking the smaller streams and allowing a thick growth of small bushes over the tamarac lands.

The Night Hawk River, which has a slow current and low, marshy shores, was crossed on the eleventh mile. Portions of the country on each side of this river are very little above the level of Night Hawk Lake and River, and are subject to being flooded at high water.

The line between the townships of Sheraton and Timmins passes through good clay land in lots nine, ten, eleven and twelve of these townships. This is somewhat wet in places, but can be readily drained where necessary. The timber is spruce, balsam, poplar and white birch, of fair size.

Further east along the base line the country is somewhat flat, with many large swamps, the timber consisting of spruce, balsam, poplar and cedar, until lot four in the township of Egan is reached, where higher land is entered. Across lots four, three, two and one of Egan the soil is of a sandy nature, and the timber is jack pine, spruce, poplar and balsam.

The base line for twenty miles of its length runs through a rather flat country, with much fallen tamarac and a heavy growth of small brush, while the country a short distance to the north is considerably higher and comparatively dry.

The few places where rock exposures occur are noted in the field notes, and no indications of economic minerals were met with.

On the plan I have shown the two canoe routes between Night Hawk River and Trout Lake, the westerly route along the outlet of Trout Lake is the one now used.

Along the south boundaries of the townships of Carman and Thomas, posts were planted at each mile and marked with the number of miles west from the district boundary. Along the south boundaries of the townships of Sheraton and Egan posts were planted forty chains apart and marked with the numbers of the lots on the east and west sides and concession one on the north sides. Iron posts were planted at every third mile, as shown in the field notes.

Accompanying this report are plan, field notes and account.

I have the honor to be, sir,
Your obedient servant,
(Signed) W. GALBRAITH,
Ontario Land Surveyor.

HON. E. J. DAVIS, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 21.)

SURVEY OF BASE AND MERIDIAN LINES, DISTRICT OF NIPISSING.

Little Current, Ont., Oct. 3rd, 1903.

Sir,—I have the honor to submit the following report on the survey of a base line and two meridians west of Abitibi Lake, in the District of Nipissing, surveyed under instructions from your department, dated June twenty-fifth, nineteen hundred and three.

As soon as possible after receiving the instructions I proceeded by way of Metagami Station on the Canadian Pacific Railway and arrived at the work on the twenty-first of July. As instructed I commenced the work at Ontario Land Surveyor Niven's one hundred and thirty-eighth mile post, on the boundary between Algoma and Nipissing, and ran east astronomically twelve miles; thence south astronomically twelve miles; thence returning to my twelve mile post; continued the base line a further distance of twelve miles, or, to my twenty-fourth mile post; from there I ran south astronomically twelve miles: thence returning to my twenty-fourth mile post,I completed the survey of the base line east of a further distance of twelve miles and forty-seven chains eighty-two links, making a total length of base line of thirty-six miles forty-seven chains eighty-two links, to its intersection with Ontario Land Surveyor Speight's meridian at a point nine chains fifty-eight links south of the forty-second mile post on the said meridian.

The twelve mile posts which I planted o nmy meridians were placed only temporarily. I produced them for some chains without blazing, and searched for Mr. Speight's base line, but in both cases he apparently had not reached my meridian.

The lines were well cut out and blazed and carefully measured. At every mile a six-inch wooden post was planted. At every township corner, or six miles, a one and seven-eighths inch iron post was also planted, while midway between the township corner a one and one-quarter inch iron post was also planted. The mile numbers were cut on all posts on the side facing the direction of the beginning of the line, numbering from west to east on the base line, and from north to south on the meridian lines. On the iron posts the cutting of the numbers and names was done with a cold chisel.

On the township corner posts the names of the adjoining townships were marked on the sides facing the respective townships. For that purpose the wooden posts at the above corners were set so that the survey lines passed through the angles of the posts.

Except in a few cases, where there were no trees close to the posts, bearing trees were marked and noted. At township corners the course and distance from the post to the tree was also cut on the tree.

At the ttwenty-fifth mile on the base line, where the mile came in a pond, a post with the mile number and plus chainage was planted on the east shore.

The magnetic variation averaged about nine degrees west of north.

On the base line the first mile is somewhat swampy, with timber large poplar and small spruce.

The second mile is sand hills, with small jack pines, birch and poplar having been burned over a few years ago, then to the Frederick House River, a little past the sixth mile, it is principally swamp, with a small, red spruce. Along the above river there is white spruce from ten to fourteen inches in diameter, though in places scattered, and clay soil. The soil in the swamp just mentioned appears to be sandy.

The seventh and part of the eighth mile is swamp,, with small spruco and some cedar, then to about ten and a half miles it is higner land, with large spruce, balsam, birch, poplar and whitewood. It is then sandy country to near the twelfth mile post, with timber principally jack pine, ranging from six to twenty-two inches in diameter.

The thirteenth mile is mostly swamp, then alternate swamp and higher land to fourteen and a half miles. From there to the seventeenth mile it is mostly higher land, rolling in places. The eighteenth mile is principally swamp. On the descent to the Abitibi River in the nineteenth mile there is a good deal of wet land. Along the above river there is excellent clay land, and good-sized timber, principally spruce, balsam, whitewood and poplar. From the twenty-second to the thirtieth mile there is considerable swamp and muskeg, probably two-thirds of the country. The remainder of the line to Mr. Speight's meridian is higher land, and along Shallow River, which was crossed in the thirtieth and thirty-first miles, the land is somewhat rolling, with timber large poplar, whitewood, spruce and balsam, and an occasional jack pine.

On the meridian which runs from the twelve mile post on the base line, in the first four and a half miles, there is a good deal of sandy country and jack pine timber, some of which is of good size and tall. In the first mile there is clay land and large birch, whitewood, and poplar and some spruce. From the sixth to the eleventh miles (inclusive) it is principally swamp, with small red spruce and dry tamarac. In places there is large white spruce and balsam, and on the higher narraw clay belts large poplar, whitewood, balsam and birch. The twelfth mile is higher land, with large spruce, balsam, poplar, birch and whitewood.

On the meridian which runs from the twenty-fourth mile post on base line, there is a great deal of swamp, the only dry, rolling country being in the vicinity of Shallow River, which was crossed in the sixth mile, also along Black River in the seventh mile and the large creek in the eighth mile.

In general regarding the timber and soil it may be said that in the swamps the timber varies from a small red spruce in the lower portions or muskeg, to a larger spruce, ranging from six to ten inches in diameter in an ordinary swamp, with black muck to some depth. A very small percentage of the whole line is muskeg, not more than three miles in all, which lies south and east of the twenty-fourth mile post. In the swamp there is dead tamarac from six to ten inches in diameter. A good deal o fthis tamarac is rotted next the bark.

In the higher and rolling lands the timber is composed of good-sized white spruce, in places from ten to twenty inches in diameter, but scattered and poplar, whitewood, balsam and birch, usually from ten to twenty inches in diameter, the soil being clay. This general description will apply to the whole tract, the exceptions to it I have already shown.

There is very little rock, only three or four small exposures of the Huronian, with no indications of mineral.

It is quite probable that, owing to the very wet season, a certain percentage of what now appears to be wet land would in an ordinary season be fairly dry.

The only burned country is in the second and part of the third and fourth miles of the base line.

The whole tract, particularly along the streams, offers, as soon as railroads are built, a splendid opening to the settler. Nearly all the soil is arable. The low-lying portions, appear to be local in extent, and could be drained at a reasonable cost.

There appears to be plenty of large game.

I have the honor to be, sir,
Your obedient servant,

(Signed) T. J. PATTEN,
Ontario Land Surveyor.

Hon. E. J. Davis, Commissioner of Crown Lands, Toronto.

(*Appendix No. 22.*)

SURVEY OF BASE AND MERIDIAN LINES, DISTRICT OF NIPISSING.

Glencoe, Ont., 28th October, 1903.

Sir,—I beg to report as follows in connection with the survey of the meridian line and three base lines in the District of Nipissing, assigned to me under instructions bearing date of twenty-third June, Anno Domini, nineteen hundred and three.

The work lay southwest of Lake Abitibi and involved a somewhat extensive canoe trip to reach it. On account of the great demands for canoes this season, suitable ones for our purpose could not be obtained, and although we had nine of the largest we could get at the time, they were comparatively small, and were quite insufficient to carry the supplies, etc., necessary for the season's work. We, however, pushed on with what we could take with us, and later arranged with a trader on Lake Abitibi to bring up part of what we had left behind. In this we were disappointed, as he failed to bring them, and as a consequence we were not able to finish the work this season. We, however, completed the first and second base lines and the meridian line, leaving the third base line yet to be surveyed.

The work was performed as directed by the instructions, and in the order therein set forth to be carried out.

All the lines were well cut out, opened up, and blazed. A wooden post not less than about six inches square and three feet above ground, made of the most suitable timber in the locality, was planted firmly in the ground at the end of each mile. These posts were marked by having the number of the mile from the starting point cut thereon, and those posts at the sixth miles, or township corners, have also the names of the townships which they mark cut into them, facing the same as indicated in the field notes of the survey.

When stones could be had a mound of them was built around the posts at the township corners, but this occurred at only one place, and in only one or two instances did the mile post come upon rocky ground, necessitating mounding with stones.

The greater portion of the chaining was checked by re-chaining. Observations for azimuth were taken frequently when circumstances would permit of this being done.

The first base line runs east from the forty-second mile post on Ontario Land Surveyor T. B. Speight's meridian line of the year nineteen hundred and two. As the end of the twelfth mile did not fall in Lake Abitibi, we produced the meridian line through the twelfth mile post northward to the lake, a distance of about ten chains, and planted wooden and iron posts, marked as shown in the field notes, at a suitable distance back from the water's edge.

This meridian line was carried south for a distance of eighteen miles, and the second base line run west from the twelfth mile post on it to intersect Ontario Land Surveyor Speight's meridian line, which it did at two chains and eighty-five links north of his thirtieth mile post.

The country traversed by the first base line is mostly green bush, except that between the fifth and seventh mile posts, the greater part of which is brule of some years' standing.

The second base line passes through considerable brule between the second and seventh mile posts. There are, however, patches of thin green timber in this part.

On the meridian line there is also more or less brule from about the middle of the third mile to about five miles and twenty seven chains and from twelve miles and sixty-four chains to the end of the eighteenth mile green bush and brule alternate.

The timber is chiefly spruce, balsam and dead tamarac, with a small amount of cedar in places on the low ground. On the higher ground there is considerable poplar and birch.

These timbers occur in areas of considerable dimensions. In parts many of the trees are of fair size, tall, and thick upon the ground. There is also considerable pitch pine of variable size and quality, in scattering patches.

The brule in places is fairly clear of timber and underbrush; in other places there is considerable small down timber on the ground, other parts are grown up to underbrush of alders, willow, cherry, hazel, moose maple, poplar, etc.

The soil along the first base line is chiefly clay, of a good quality. The part burnt over, however, is chiefly sandy, with stones and boulders in parts. Along the meridian line the soil might be said to be clayey for the first three miles, and then it is more variable, being clay loam, sandy loam, light sandy land and rocky ridges, sand and boulders, etc. From the twelfth mile to the eighteenth mile the soil is generally sandy.

Along the second base line the land is for the most part sandy, with small areas of fair quality.

Most of the areas burnt over are rolling and sandy, while the more level and swampy lands are green. In the swamps there is generally a considerable depth of soft, spongy vegetable, growth on a subsoil of clay or sand. These swamps, although pretty wet and of considerable area, can, in my opinion, be readily drained, as most of the creeks encountered had fairly swift currents.

The general surface of the land is from level to rolling, and is not to any great extent broken. There are some high hills within view, but those touched by the lines were, for the most part, comparatively small. Some rocky ridges were encountered, but these formed a small percentage of the total area.

No minerals of importance were noticed, except that on the meridian line at about sixty chains in the eighteenth mile the compass needle was strongly deflected in passing over a ridge of boulders and rock.

I might here mention that Mr. G. F. Kay, Geologist, and his men, referred to in your instructions, were met within the early part of the work, and were furnished by us with some provisions of which they were much in need. A list of those supplied them accompanies this report.

I regret very much my inability to complete my contract this season, as when that part already referred to was accomplished, our remaining supply of provisions was not more than enough to take us out, and for this reason we were obliged to abandon the continuance of the survey for the present.

The route to the work, being over part of the Hudson's Bay Company's canoe route from Quinze Lake, in the Province of Quebec, to Moose Factory, is through some comparatively large waters, where one may readily be wind bound for days at a time, and we were not without this experience. The season was an exceptionally wet one, and this did not tend to the advancement of the work.

With this report I also forward field notes of the survey, made out in the usual form, and a map showing the lines run.

I have the honor to be, sir,
Your obedient servant,

(Signed) JAMES ROBERTSON,
Ontario Land Surveyor.

HON. E. J. DAVIS, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 23.)

SURVEY OF MERIDIAN LINE, DISTRICT OF THUNDER BAY.

Port Arthur, Ont., 8th September, 1903.

SIR,—I have the honor to submit the following report on the survey of meridian line from the north boundary of the township of Dorion to McIntyre Bay, Lake Nepigon, District of Thunder Bay, surveyed under instructions from your Department, dated July sixth, nineteen hundred and three.

I commenced at a post on Ontario Land Surveyor David Beatty's base line, run from the northwest corner of the township of Purdom, marked "IX. M. 38.30 C.," and produced the line west astronomically two miles, forty-one chains, seventy links, to complete twelve miles. Here I planted one and seven-eighths inch iron post alongside a wooden one, each marked "XII. M." on east side. From this point I ran the meridian north astronomically to McIntyre Bay, a distance of twelve miles, sixty-seven chains, seventy-four links; wooden posts were planted every mile, one and one-fourth inch iron at the third and ninth mile and on the bay shore, also one and seven-eighths inch iron posts at the sixth and twelfth mile. All posts were marked with number of mile on south side.

I then returned to the base line and ran the meridian line south astronomically to the north boundary of Dorion, a distance of twenty-seven miles, fifty-seven chains, fifty-two links. Wooden posts were planted at each mile, one and one-quarter inch iron posts at the third, ninth, fifteenth and twenty-first miles, and one and seven-eighth iron posts at the sixth, twelfth, eighteenth, twenty-fourth miles, and at the intersection with the north boundary of the township of Dorion, each marked with the number of mile on north side; this intersection is distant west thirty-seven chains, fifty links from the north-east corner of lot 14, concession 10, where I found the original post standing and quite sound.

But few stone mounds were made, as loose stones could not be got. Whenever possible I took observations on the east elongation of Polaris. The magnetic declination of needle was two degrees thirty minutes east, azimuth of Polaris one degree fifty-one minutes for latitude forty-nine degrees north. Black Sturgeon River was the only large stream crossed; it is rapid but shallow. Besides Nonwatin Lake, the line only crossed one small lake and a few small ponds, some caused by beaver dams.

Commencing at Ontario Land Surveyor David Beatty's base line, and going north, the country is very heavily timbered with large birch, spruce, poplar, tamarac, Banksian pine, and in places cedar. These averaged from fifteen to twenty inches in diameter. No traces of fire were to be seen. The same timber continued south for thirteen miles, except a large spruce swamp, in which the trees were generally small and scattered. The last fourteen miles south has been overrun by fire some thirty years ago. The timber is mostly small, scattered poplar, Banksian pine and scrub. There is no soil from the north boundary of the township of Dorion north for about fourteen miles, fit for cultivation, the surface being mostly decomposed red sandstone, from which fire has destroyed the vegetable mould. From this north to Nonwatin Lake the soil is rich, but stony. From Nonwatin to McIntyre Bay the land improves very much, there being considerable areas of rich, sandy loam and white clay in the valleys. I estimate that about thirty per cent. of the land is good, from what I could see. There are numbers of places where boulders lie about a foot below the surface. Red sandstone is the prevailing rock, in many places covered by trap, which form perpendicular bluffs. On the shore of McIntyre Bay where the line ended trap is the only rock visible.

Herewith are plan of survey, field notes and account.

I have the honor to be, sir,
Your obedient servant,

(Signed) A. H. MACDOUGALL,
Ontario Land Surveyor.

Hon. E. J. Davis, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 24.)

TOWNSHIP OF COULSON, DISTRICT OF NIPISSING.

Sault Ste. Marie, Ont., December 24th, 1903.

Sir,—In accordance with your instructions of June thirtieth last, I beg to report on the survey of the township of Coulson, in the District of Nipissing.

I found from correspondence that men were very scarce in the Temiskaming country, and that canoes could not be procured at all, and so took my men from the Sault. All old-seasoned voyagers, who had been with me for many a year, also a first-class outfit of large Peterboro' canoes, the "English Company" model, which I have always found most satisfactory. I met my other assistants at North Bay and proceeded to Mattawa, from thence to North Temiskaming by rail and steamer Meteor, arriving three days from leaving the Sault, thence by way of the Quinze, Long, Island and Abitibi Lakes, to the Abitibi River, from thence by portage about four miles to the northeast angle of Coulson. Thirteen days, with the best outfit, men and canoes to be had, not very "easy of access," as my instructions informed me it would be.

I lost some considerable time in endeavoring to find Mr. Patten's base line, which was to form my northern boundary, and at last decided to commence my work at the iron and spruce posts at the thirty-sixth mile on Ontario Land Surveyor Speight's meridian line of 1902, as the southeast angle of Coulson, instead of as my instructions stated, measuring from the intersection of Ontario Land Surveyor Patten's base line with Ontario Land Surveyor Speight's meridian line, a distance of six miles south along said meridian line. This was, of course, a great disadvantage to me. With this exception, I made the survey in accordance with the instructions, taking frequent observations for azimuth. I found the variation ten degrees five minutes west. In no place did I notice any local attraction.

The township is generally level, some slightly rolling land, with a few rock exposures on the north boundary and the same on the south of the township, the rock exposures all Huronian. A considerable amount of brule on the south. The timber is spruce, poplar, balsam and birch of large size, the poplar exceedingly so. Some trees being from thirty inches to thirty-six inches in diameter, and very tall. The soil generally is grey clay, and is very tenacious. The surface is as a rule covered with water. There is a heavy windfall and the underbrush is dense. Shallow River runs through the township, a muddy, narrow stream about a chain in average width, blocked with numberless jams and densely fringed with willow and alder. With proper drainage the country will no doubt form a valuable agricultural section.

The climate was not a pleasant one; it rained more or less nineteen days out of twenty. The thunder storms we had were the worst in my experience.

We found practically no game in the country, a few ruffed grouse, some moose and bear tracks.

I have to thank Messrs. Malone of North Temiskaming, Klock of Klock's farm, Skeene of the Hudson Bay Company, and Biederman of the Narrows for courtesies extended, also and especially the captain and officers of the steamer Meteor.

I returned to Sault Ste. Marie by the same route I followed going in, taking about the same time.

I am, sir,
Yours faithfully,

(Signed) JOSEPH COZENS,
Ontario Land Surveyor.

Hon. E. J. Davis, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 25.)

TOWNSHIP OF WILKIE, DISTRICT OF NIPISSING.

Sault Ste., Marie, Ont., Dec., 24th, 1903.

Sir,—In accordance with your instructions of June thirtieth, A.D., nineteen hundred and three, I beg to report on the survey of the township of Wilkie, in the District of Nipissing.

As it adjoins the township of Coulson on the west and was surveyed immediately after Coulson, I need say nothing of my method of reaching there.

The township is practically of the same character as Coulson, rather more level, and certainly better. There is a large amount of spruce swamp, the spruce being small and scrubby. Timber otherwise same as in Coulson. All tamarac found was dead.

I followed my instructions as in Coulson, taking observations whenever weather permitted. We had several snowstorms towards the end of the work and had to come out for lack of provisions, leaving a few hundred acres at the southwest corner of the township unsurveyed. The difficulty of getting provisions to this point was extreme.

The township would require drainage to make it of value.

I am, sir,

Yours faithfully,

(Signed) JOSEPH COZENS,
Ontario Land Surveyor.

HON. E. J. DAVIS, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 26.)

TOWNSHIP OF WALKER, DISTRICT OF NIPISSING.

Peterborough, Ont., January 8th, 1904.

SIR,—I have the honor to submit the following report on the surveys performed by me according to instructions from your Department, bearing date of July third, A.D., nineteen hundred and three.

The work allotted to me, as detailed in those instructions, was the subdivision of the townships of Walker and Clergue, situated in the vicinity of the junction of the Black and Abitibi Rivers, in the District of Nipissing.

We left Toronto on the eleventh of July and proceeded to Matawa, where supplies were obtained and three additional men engaged, our party now numbering thirteen men. From Mattawa we proceeded by the usual rail route to South Temiskaming, and thence by steamer to North Temiskaming. We then took the portage road to Klock's Depot, and there launched our canoes on the Quinze Lake and proceeded by the usual canoe route to the Hudson Bay Company's post at the east end of Lake Abitibi. After a short delay at this point we continued our journey westward on Lake Abitibi to Biederman's Narrows, and thence to the Abitibi River, down which our course lay to the mouth of the Black River, at which place we arrived on the twenty-seventh day of July, the time spent on the trip from Toronto being seventeen days. Considerable delay in commencing the work was caused by the fact that the boundary lines from which I should start had not yet been run.

As soon as I could get a start I commenced work, and subdivided the township of Walker in the usual way, and also continued the line which bounds the south side of Walker, six miles west along the south side of the township of Clergue, but I was unable to subdivide the latter township owing to the lateness of the season.

The township of Walker consists chiefly of rolling clay loam, broken near the river by deep ravines, and well drained and watered by an abundance of spring creeks. I would consider it good arable land.

The whole township is heavily timbered with spruce, poplar, balsam, birch and balm of gilead, of good quality, and in general large, with some cedar along the river banks.

A ledge of cherty rock, carrying some iron in the form of pyrites, extends in a southeasterly direction across the township to the Black River, but no minerals of any importance were found. This same cherty rock shows wherever rapids occur on the Driftwood River. Through the township of Walker run the Abitibi, Black, Driftwood, and Shallow Rivers. The Abitibi is a fine, large river, having an average width of from five to six chains; the current is very swift and the water murky, on account of the clay country through which it runs. The land at the shores is in general level or gently sloping to the banks, which are nearly perpendicular, so that the water deepens very quickly, and the abundance of water-worn stones, so common on our Ontario beaches, is wanting.

The Black, too, is a fine river, with an average width of from two and a half to three chains, but the current is slow and the water very deep, the color of which is very striking, being nearly like that of fairly strong tea. This is particularly noticeable where the waters of the Black mingle with the greyish current of the Abitibi. The shores of the Black are very similar to those of the Abitibi, there being no shoal, but deep water almost from the shore line.

From markings on the trunks of trees I should judge that the water in spring rises to a height of from seven to eight feet. The Driftwood River enters the Black a little over half a mile from its mouth: it is quite deep for a considerable distance from the mouth and averages about one chain in width.

Unlike the Black the banks of the Driftwood are in many places precipitous, but where rapids occur (of which there are several in the township) the shore on either one side or the other is sufficiently level for a building site. The first rapid is a little over one mile from the mouth of the river, but there are no water powers of much importance.

The magnetic variation is general at nine degrees west, there being no remarkable amount of change in this variation.

What muskeg there is in the township is mostly along the boundaries. The soil becomes much better as you proceed northward from the south boundary.

A few moose were seen and tracks were plentiful along the rivers. Evidences of the presence of beaver were numerous and mink and muskrat abound. Partridge were very plentiful, but duck were scarce. The raven and the Canada jay (whisky jack) were the birds most commonly seen, and the "too-who" of the owl was often heard at night. Pike, pickerel, and white fish are plentiful, but cannot easily be caught except by net.

The wild fruits observed were raspberries and wild currants, both being plentiful and seemed to be about the only food upon which the partridge lived.

A noticeable feature about the township of Walker is that it is covered almost entirely by virgin forest, and has never been overrun by fire.

Accompanying this report are my plan and field notes.

I have the honor to be, sir,
Your most obedient servant,

(Signed) ALFRED J. CAMERON,
Ontario Land Surveyor.

HON. E. J. DAVIS, Commissioner of Crown Lands, Toronto.

(*Appendix No. 27.*)

SURVEY OF TISDALE, DISTRICT OF ALGOMA.

Orillia, Ont., December 29th, 1903.

SIR,—In compliance with your instructions, dated the seventh day of July, A.D., nineteen hundred and three, for the survey of the townships of Whitney and Tisdale, we proceeded, as soon as arrangements for carrying out the work could be completed, to Metagami, on the main line of the Canadian Pacific Railway. From the latter place our party embarked in canoes and followed the tributary waters of the Spanish River to the height of land, and thence by lake and stream to the Hudson's Bay Company's post at Metagami. With the exception of one shallow, snag-infested creek on the south side of the height of land and two or three shallow stretches in the creeks immediately to the north of it, the route was found to be an excellent one. From the above mentioned post we continued down stream through the several lakes and their connecting streams forming the head waters of the Metagami branch of the Moose River, and down the latter stream to a point about five miles by river distance below the crossing of Ontario Land Surveyor Niven's base line, run from the one hundred and twentieth mile on the boundary between the Districts of Nipissing and Algoma, where a portage trail leaves the right bank of the river, and passing in an easterly direction, crosses the westerly boundary of the above township of Tisdale a few chains south of the line between concessions two and three. Thanks to the route map furnished with our instructions and the ready information furnished by the geniel manager of the post at Metagami, Mr. Miller, no difficulty was experienced in travelling through this country without guides. The portages throughout were in excellent condition, having been much used by the employees of the Hudson Bay Company in transporting freight; but, owing to the length of the journey and the large quantity of supplies required to be carried, about two weeks were consumed on the trip, though our party was made up of men well used to this method of travel and expert canoemen. Should the present projected railway line become a fact, the waters traversed by this route will afford many attractions to the sportsman and tourist. The long, island-studded lake stretches abounding in whitefish, pickerel and pike, the diversified scenery of lake and river passing through a country not yet marred by fire or the axe of the lumberman, and the opportunities offered to the hunter of big game combine to make this region a tempting resort. The canoe and portage route traversing the township of Tisdale and entering Porcupine Lake near the intersection of the line betwen concessions two and three with the east boundary of the township was carefully noted and shown on the map.

Partly owing to the fact that the portage trails on leaving the Metagami River pass through a comparatively flat country and were in a bad condition fr travel due to pools of standing water and deep mud holes, making it difficult to pack supplies, and partly to the advanced season and threatening weather, it was deemed advisable to begin the survey at the west boundary of the township, which had been recently run by Mr. Speight, O.L.S. This course was accordingly followed and the lines between the first and second and the second and third concessions were run from the one and two mile posts on this line, thereby effecting a considerable saving of time, by allowing the packers to move supplies ahead and make caches at points that could be conveniently reached later on in the operations. In all other respects the above instructions were closely followed, special care being taken in regard to the planting and marking of posts.

The concesison lines were run due east and west and the side lines due north and south, astronomically, dividing the township into blocks of one square mile, each block containing two lots. The concessions were numbered from one to six, beginning at the south boundary of the township, and the lots from one to twelve beginning at the east boundary. A single row of wooden posts, of the most durable timber obtainable in the locality were planted at the intersection of all side lines with concession or boundary lines excepting where such intersection fell in a lake, in which case a post was planted on the side line at the north shore of the lake. The post so planted at the intersections of concessions and side lines were marked on the north and south sides with the numbers of the respective concessions, and on the east and west sides with the proper lot numbers. Wooden posts were also planted on the concession lines and on the south boundary to mark the division lines between the lots of each block. These posts were marked with the numbers of the lots on the east and west sides and with the number of the concession on the north side only, in accordance with the system of single front concessions. In addition to the wooden posts above mentioned, iron posts, one and one-quarter inches in diameter and three feet long, were planted on the line between concessions three and four, one at the intersection with the east boundary marked on the north side Con. IV., on the south side Con. III., on the west side I., and on the east side XII.: one at the intersection of the side line between lots six and seven, marked on the north side Con. IV., on the south side Con. III., on the east side VI., and on the west side VII., these iron posts being planted with the view of insuring permanency for the survey in case of fire. The iron post planted on the south boundary by Mr. Niven, at the end of his sixth mile, being the southeasterly angle of the township of Tisdale and the southwesterly angle of the township of Whitney, was marked on the northeast side with the name Whitney, on the northwest side with the name Tisdale, and on the southeast side with the name Dance. At the northeast angle of the township we found an iron post planted by Ontario Land Surveyor Brown, marked Hoyle on the northeast side, Murphy on the northwest side, Whitney on the southeast side, and Tisdale on the southwest side, Con. I., on the north side, and the lot numbers XII., and I., on the east and west sides respectively. Upon this post we marked Con. VI., on the south side.

The incessantly cloudy weather and frequent rains, besides interfering greatly with the progress of the work, rendered it difficult to obtain satisfactory astronomical observations, but when opportunities presented themselves they were not neglected. Much local magnetic attraction was observed, especially in the southwesterly portion of the township, and in other places the compass needle would show a stable declination from the astronomical meridian for a mile or more, then suddenly shift through half a degree and continue upon this reading for another mile or two, all the while apparently working in a normal way.

The southerly portion of the township through the first and second concessions is rough and broken by low ridges and rocky outcrops, chiefly schists and granite; and, while the numerous showings of quartz may be found upon closer examination to contain valuable minerals, this part is scarcely suitable for purposes of agriculture.

Through the central easterly part in concession three some small areas of clay land were met with, but the general character is sandy.

The northerly part is generally low land, sandy even in the swamps, with an elevated sandy area extending across concession three, four and five on lots eight, nine and ten.

The timber in the lower parts consists chiefly of spruce and tamarac, the latter, much of which runs to eighteen inches in diameter, is mostly dead. White birch, poplar and balsam occur on the higher parts, while the sandy elevation above referred to is occupied almost exclusively by jack pine of good size and suitable for making railway ties. The chief value of the timber on the entire area, however, would be for paper pulp and would cut out a quantity much in excess of the limits held for that purpose further to the south.

No stream of any considerable size was met with, but the country is well watered by small creeks invariably containing water of good quality. The few lakes that occur are shallow, with a muddy sediment covering the bottom, contain clear water and an abundance of pike. Along almost all the streams beaver were plentiful, many new dams being met with, and occasional signs of moose and caribou were observed.

On the whole, the above township is not one that could occupy the first place as regards agricultural possibilities, but would be valuable rather for pulp timber and possible mineral prospects, the latter of which could only be ascertained by careful prospecting. The northeasterly portion, however, would furnish some fair agricultural land.

We have the honor to be, sir,
Your obedient servants,

(*Signed*) CAVANA & WATSON,
Ontario Land Surveyors.

Hon. E. J. Davis, Commissioner of Crown Lands, Toronto.

(*Appendix No. 28.*)

TOWNSHIP OF WHITNEY, DISTRICT OF ALGOMA.

Orillia, Ont., December 29th 1903.

Sir,—In compliance with instructions dated the seventh day of July, A.D., nineteen hundred and three, we beg to report that we have completed the survey of the township of Whitney, in the District of Algoma. We entered this township over the portage trails through the township of Tisdale, lying immediately to the west, forming the route of travel from the Metagami River through Porcupine and Night Hawk Lakes. The portages shown on the plan of this township and forming the direct route between Porcupine Creek and Night Hawk Lake have been apparently but little travelled of late years, the longer water route being preferable. They were found to be wet in places, but traverse level country and were fairly passable, and proved to be valuable in transporting supplies needed in carrying on the work in the northerly part of the township.

Owing to reasons fully stated in our report of the survey of the township of Tisdale, the lines between the first and second concessions and between the second and third concessions were run from the posts planted on the westerly boundary of the township to the east boundary. The concession lines throughout were run due east and west, and the side lines due north and south astronomically, dividing the township into blocks of approximately one square mile, each block containing two lots. A single row of wooden posts were planted on the lines running east and west only, at alll intersections and lot corners, except where such points came in lakes, in which case a past was planted on the side line to which such post referred, at the northerly shore of the lake, and was marked on the east and west sides with the lot numbers and on the north side with the concession number. The posts planted at the intersections of all side lines with concession lines or boundaries were marked on the north and south sides with the numbers of the respective concessions, and on the east and west sides with the numbers of the lots. Those planted to mark the division line between the lots in each block were marked with the lot numbers on the east and west sides, and on the north side only with the concession number, in keeping with the above instructions and the practice regarding single front concessions. Iron posts were planted beside the wooden posts on the line between concessions three and four, one at the intersection with the side line between lots six and seven marked on the north side Con. IV., on the south side Con. III., on the east side VI., and on the west side VII.; and one at the west boundary marked on the north side Con. IV., on the south side Con. III., on the east side XII., and on the west side I., these iron posts being planted with the view of insuring permanency for the survey in case of fire. On the south boundary the iron post planted by Mr. Niven, O.L.S., at the end of his third mile was marked on the north Con. I., on the east VI., on the west VII., and from this post the side line between lots six and seven was started. The iron post planted by Mr. Niven at the end of his sixth mile, being the southwesterly angle of the township was marked on the northeast side Whitney, on the northwest side Tisdale and on the southeast side Dance. The iron post planted by Ontario Land Surveyor Brown and marked on the northeast side Hoyle, on the northwest side Murphy, on the southeast side Whitney and on the southwest side Tisdale; on the north side Con. I., on the east side XII., and on the west side I., was marked on the south side Con. VI.

A notable characteristic of this part of the country is the lack of marked topographical features, having a generally even or rolling character. It is well watered by numerous small streams, having generally a good currant and affording good outlets for future drainage operations. The water is also of good quality. The chief stream is Porcupine Creek, draining the lake of the same name. This is shallow and sluggish in places, there being scarcely sufficient depth of water to float a loaded canoe. A comparatively small area of the township is taken up by lakes. The lakes themselves contain clear water of no great depth and abound in pike and to a lesser extent in pickerel.

The southwesterly portion of the township is rocky and rough and apparently of little value. The rock exposures consist chiefly of schists tilted at a high angle, and occasional outcrops of granite, containing seams of quartz. The balance of the township and especially its eastern half, is good clay and, of level or gently rolling character, and well adapted for agricultural purposes. The clay, which is stiff and of a grey color burning to a buff, will probably be found to make an excellent brick. In places along the streams, where the opening permits the growth of grasses, a luxurious growth of blue joint upwards of five feet in height was observed. The bush land also contains a profusion of wild currants of both red and black varieties, and raspberries.

All of this land could readily be drained, and many of the flats which have the appearance of swamps would only require to be cleared to convert them into an arable condition, as in all cases there was found to be a solid clay bottom beneath the moss covering. We should consider at least eighty per cent., of this township to have good agricultural prospects.

The timber is of the usual mixed varieties, notable for the absence of pine, spruce being far in excess of any other in quantity. The average diameter of all timber would not exceed eight inches, but would furnish a large quantity of pulp wood per acre. On the knolls poplar is much in evidence and attains a diameter as high as thirty inches. White birch, though forming a considerable proportion of the whole, is generally of small diameter. The tamarac is mostly found to be dead, except young trees. Cedar seldom attains a height of more than thirty to forty feet and the larger trees are usually hollow. Balsam is generally distributed and usually small. A few samples of the black ash were met with, a good deal of mountain ash and some juniper.

We have the honor to be, sir,
Your obedient servants,

(Signed) CAVANA & WATSON,
Ontario Land Surveyors.

HON. E. J. DAVIS, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 29.)

TOWNSHIP OF CURRIE, DISTRICT OF NIPISSING.

North Bay, Ont., December 19th, 1903.

Sir,—I have the honor to submit the following report of the survey of the township of Currie, in the district of Nipissing, made under instructions from your department dated July third, A.D., nineteen hundred and three.

Having procured men and supplies I proceeded to North Temiskaming by rail and steamer. From thence I proceeded by waggon road to Quinze Lake, a distance of some sixteen miles, and, after a canoe voyage lasting some nine or ten days, I arrived at a point on Black River, at the mouth of a tributary of that stream, which I named Log-jam River, from the numerous log jams in it. I arrived there on the eighteenth of August, but it was not until the twenty-seventh that I was able to commence the survey of the township of Currie. On that date I met Mr. Speight, Ontario Land Surveyor, who along with his party, were then engaged in running the north boundary of this township, and I at once began work by running south astronomically from his mile posts. Thus all the side lines except that between lots ten and eleven were run from the north instead of from the south. I did this to avoid further delay. I ran the concession lines and the south boundary of the township of Currie west astronomically from the several mile posts planted by Mr. Speight on the east boundary of that township, but few lines were run with the magnetic compass, as the variation was so unreliable that I found it impossible to do good work with it. The declination was ten degrees west on the north boundary, and fell to six degrees on the south of the township.

The iron posts, referred to in my instructions to be planted with a view to insuring permanency for the survey in case of fire, were planted and marked at the point indicated therein, and large wooden posts, similarly marked, were planted beside them.

The township of Currie is comparatively level, and, with the exception of the steep hills along the river banks and a few ravines along its tributaries, the only hills worth mentioning being a high, rocky ridge near the southeast angle of the township and another high hill at the southwest angle of lot three, concession one. This latter hill rises about three hundred feet above the surrounding country and terminates in a rocky peak, from which a good view of the surrounding country can be obtained.

The soil is clay and clay loam, with an occasional area of sandy loam, and although wet in places, can easily be drained, and all the small streams have a strong current. About ninety per cent. of the township is well adapted for agriculture and most of the land, although hard to clear, can be made as productive as any part of the Province.

I do not think the climatic conditions any serious detriment to the early settlement of this portion of the Province.

The timber is chiefly spruce, which will average about fifteen inches, poplar, averaging about the same size, balm of gilead averaging about eighteen inches, birch and tamarac each averaging about twelve inches. The latter is all dead, but is yet sound enough for railway ties. There are a few large cedars (twelve to twenty inches) found growing along the bank of the streams, also a few jack pines on the higher lands, but of little value. Very few white pine trees were found, but what I saw were of good quality. The underbrush is very thick, and in many places is so bent down that it presents the appearance of a field of lodged grain. This is due to the great amount of sleet falling during the winter season.

One noticeable feature is the almost entire absence of beaver meadows, notwithstanding the swampy nature of the country. Log-jam River flows through the eastern portion of this township. It has a very uniform width of about ninety links, and will average about five feet in depth in ordinary low water and flows with a strong current. This stream is not canoeable, owing to the many jams of driftwood in it.

There is a good mill site on this river in this township. This is on lot two, concession one, and within three chains of the south boundary. The river has a natural fall of nineteen feet, eight inches; the estimated energy that could be developed is about two hundred and ninety-five horse power at average low water.

There is very little rock to be seen in the township, save in the hills above mentioned and in the bed of the river. These outcrops are all Huronian. There were no indications of economic minerals in the township.

Fur bearing animals abound in the district, bear, beaver, otter, mink and muskrat are numerous. There are no wolves to be found there.

Moose and caribou are also there, but in somewhat limited numbers.

Accompanying this report are plans, field notes, etc., of the survey of this township.

I have the honor to be,
Your most obedient servant,

(Signed) JOHN H. SHAW,
Ontario Land Surveyor.

Hon. E. J. Davis, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 30.)

TOWNSHIP OF EVELYN, DISTRICT OF NIPISSING.

Woodstock, Ont., December 22nd, 1903.

Sir,—In accordance with your instructions, dated June twenty-sixth, A.D., nineteen hundred and three, I left Metagami Station on the Canadian Pacific Railway, on July eleventh last for Frederick House Lake, to subdivide the townships of Evelyn and Dundonald. The map of the canoe route furnished me by the Crown Lands Department I found complete and very satisfactory. I had no difficulty in finding the proper channels and portages.

Herewith I send you a copy of my field notes and a plan and a timber map of the township of Evelyn.

I found little more than half of this township suitable for cultivation. The good land is level and more or less swampy, but drainage will be comparatively easy, as the elevation of this swampy land is considerably above that of Frederick House Lake. Severel creeks with good currents show considerable fall. In fact, much of this level country will, I think, need only clearing to become dry.

As shown on the plan accompanying this report, there is a belt of sandy hills, stretching from the southeast corner of the township, where it is about two miles wide, to the northern boundary, where it is nearly the whole width of the township. In the southern part of the township these hills have only a slight elevation above the surrounding country, hardly interfering with the general level character of this part of the township. In the northern part, however, they are from fifty to one hundred feet high and are intersected by numerous ravines and valleys, often having quite steep sides. There are on these hills several plateaus of from half a mile to a mile in extent.

Among the hills are a number of small lakes, ranging in magnitude from ponds of hardly one chain in diameter to Ice Chest Lake, which is about a mile and a half long. A peculiarity of most of these lakes is that they have apparently neither inlet or outlet, being completely surrounded by high hills. The water in all of them, however, is beautifully clear. In this they are a great contrast to Frederick House Lake, which is, on account of the clay surrounding it, and Night Hawk Lake, and the extreme shallowness of the water, always very muddy. Ice Chest Lake is probably drained by soakage through the muskeg to the south of it, out of which flow a couple of goodsized creeks. Lake Nerandeau is probably drained in the same manner through the swamp and muskeg along the western limit of the township.

In all this sand belt there are on, or near, the surface many stones and drift boulders. This fact, and the coarseness of the sand in most places, would make it generally unsuitable for cultivation.

The northern part of this sand belt has been almost entirely denuded of trees by fire. Much of it was covered, probably not more than fifteen years ago, by a white pine forest. Many valuable trees are still standing uninjured, either isolated or in clumps. This brule is generally covered by a thick growth of white birch or with small scattered jack pine.

Most of the timber in the rest of the township is small spruce, seldom, except in the heavily timbered part near Frederick House Lake, exceeding ten inches in diameter, while most of it is much smaller. In the southwest corner of the township and in the muskeg south of Ice Chest Lake and Lake Nerandeau few trees exceed five inches in diameter. Along the shore of Frederick House Lake, except in concession six and part of concession five, the timber is much larger. Here there are many large spruce, poplar, birch, cedar and tamarac. The tamarac here, as elsewhere in the township, is all dead or dying.

The clay soil seems generally very suitable for cultivation, being in some parts quite loamy and nearly always free from stones of any kind. At the Indian Cabin, on lot four, concession four, about half an acre was planted with potatoes, which I found of good quality and well matured about the first of September.

Wild fruit in great variety is abundant, very fine raspberries, strawberries and currants are plentiful in the more open country, maturing, however, much later than in southern Ontario. On the sandy hills in the northern concessions remarkably fine blueberries grow in unlimited quantities, ripening about September first, and continuing in excellent condition until destroyed by frost about the twentieth of the month.

There is no evidence of any economic mineral in any part of the township, though native rock crosses out along the shore of Frederick House Lake, in concessions four and five. This rock appears to be some kind of diorite.

Along the shore of Frederick House Lake, at the intersection of the line in front of concession six with the water about three or four feet of peat appears. This peat is seen for only a short distance on the shore, but, judging from the nature of the country to the west and north of this point, may extend for a mile or more in these directions.

I have the honor to be, sir,
Your obedient servant.

(Signed) A. D. GRIFFIN,
Ontario Land Surveyor.

HON. E. J. DAVIS, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 31.)

TOWNSHIP OF MILLIGAN, DISTRICT OF NIPISSING.

Bruce Mines, Ont., December 8th, 1903.

SIR,—I have the honor to submit the following report of the survey of the township of Milligan, in the District of Nipissing, made under instructions dated June twenty-sixth, A.D., nineteen hundred and three.

I left Bruce Mines on July twentieth, having arranged with my assistants to meet me at Mattawa. We arrived at North Temiskaming on Wednesday, July twenty-second. Here I engaged men and arranged for the transport of my supplies over the waggon road to Klock's farm on Quinze Lake. We left North Temiskaming on the morning of Friday, July twenty-second, paddling our canoes up the Ottawa River to Quinze Lake. Thence we followed the regular canoe route to Lake Abitibi and arrived at our work without mishap, except some delays on account of bad weather.

Owing to my township lines not being completed when I arrived on the ground I was delayed somewhat on the start, and was compelled to depart from my instructions. Instead of running my side lines from the south boundary, as instructed, I started each side line from the north boundary and ran south. The concession lines were all run in the regular way, starting at the east boundary, otherwise the township was surveyed in the usual manner. The field notes of the side lines, however, are reversed so as to read continuously from south to north. Every possible care was taken in the planting and marking of the posts, and the lines are all well cut out and blazed.

GENERAL FEATURES.

The township is low, wet and swampy, with the exception of a portion on the west side, which is composed of high sand and gravel plains. This portion has been fireswept, and is now growing up with brule. About eighty per cent. of the total area, however, is dense green bush. One noticeable feature is the large amount of fallen timber. There are a number of small lakes and ponds. The surface of the country as a rule is somewhat rolling, but there are very few hills of any account.

SOIL.

The soil in the greater portion of the township is a light sand loam, and in places very sandy. It is, however, covered with several inches of rich mould. In those portions which have escaped the fire this mould has been permitted to accumulate. There is, however, very little good clay soil in the township. Along the western portion of the township the land is a barren sand waste, which has been fire-swept, and is now growing up with brule. Of the portion which has escaped the fire, at least sixty per cent., is too wet and swampy for agricultural purposes, without some large system of drainage. Take it as a whole, I would consider it as a poor township for agricultural purposes.

TIMBER.

About eighty per cent. of the township is covered with a splendid growth of spruce, poplar, balsam, white birch and jack pine. This timber is of fine quality and grows to a large size. There is also a large quantity of fine tamarac, but, unfortunately, it has all been killed by an insect pest, which over-ran this section some years ago. Much of this tamarac is still sound, however, especially in the swampy places. This insect does not appear to have attacked any timber except the tamarac.

MINERALS.

There are very few outcrops of rock of any kind and no traces of economic minerals were seen. Such outcrops of rock as were seen are of green diorite and chlorite.

WATERS.

Numerous small lakes occur, scattered throughout the northern half of the township. In the high sandy area towards the western side of the township the water in these lakes is beautiful, clear spring water, while in the more swampy section the lakes are brown and muddy. Numerous small streams occur. The largest stream is Low River, a sluggish stream of about thirty-five to forty feet wide, flowing out of a lake on the eastern side of the township. There are no water powers.

FISH AND GAME.

Moose and deer are very scarce, but bear are quite plentiful. Otter, mink and marten are occasionally seen, while partridges and wild duck are fairly plentiful. Pike and pickerel are plentiful in the lakes.

The magnetic variation is fairly constant, at about nine degrees, thirty minutes west.

Accompanying this report are a general plan, a timber plan and field notes of the survey.

I have the honor to be, sir,
Your obedient servant,

(Signed) JAMES S. DOBIE,
Ontario Land Surveyor.

HON. E. J. DAVIS, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 32.)

TOWNSHIP OF JAMES, DISTRICT OF NIPISSING.

Leamington, Ont., December 24th, 1903.

SIR,—I have the honor to submit the following report of the survey of the township of James, in the District of Nipissing, surveyed by me during the past summer, as directed by instructions from your Department, dated twenty-ninth of June, A.D., nineteen hundred and three.

Under these instructions I was also directed to survey the township of Barber, the survey of James being first proceeded with and completed.

Leaving here on the fourth of August last I proceeded with most of my party by rail to Temiskaming Station, on the Canadian Pacific Railway, thence by steamer to Haileybury, where supplies were obtained and my party completed and from there we proceeded via Bay Lake and the Montreal River to a small clearing within the township, near the foot of Elk Lake and adjoining the west boundary of the township of Tudhope, in the second concession. From there the southeast angle of the township, which is identical with the southwest angle of the township of Tudhope, was readily reached, and the iron post placed to mark the southwest angle of that township was found standing, which post I marked with the name James, on the side facing the township. Having obtained an observation of Polaris I ran a line due west astronomically from this post, a distance of six miles, for the south boundary of the township, planting posts at regular intervals of forty chains apart thereon, to mark the front angles of the lots in the first concession. From each alternate post the lot lines were run due north astronomically. At the end of the third mile on this line one of the small iron posts, supplied me by the Department, "properly marked," was planted alongside of the wooden post, placed there to mark the intersection with the line between lots six and seven. At the end of the sixth mile, to mark the southwest angle of the township, one of the large iron posts supplied me, "properly marked," was planted alongside of a wooden post. The name of the township being cut on the side facing the township, and from these last-mentioned posts the west boundary line of the township was run due north astronomically.

From each of the posts planted at regular intervals of eighty chains apart from the southeast angle of the township north along the east boundary, the concession lines were run due west astronomically for the front of the several concessions, and the posts properly marked and planted on each line as directed.

The iron post found standing at the northeast angle of the township was marked with the name James on the side facing the township and the north boundary run due west astronomically therefrom.

At the intersection of the north boundary with the west boundary a large iron post was planted alongside of a wooden post, to mark the northwest angle ohfte township with the name of the township marked on the side facing the township.

Small iron posts, supplied me, "properly marked" were planted alongside the wooden posts, as directed, on the line between the third and fourth concessions namely, at its intersection with the east and west boundaries and at its centre section with the line between lots six and seven; also one at the intersection of the line of lots six and seven with the north boundary. These were planted with a view to insuring permanency for the survey in case of fire.

All lines run were well opened and blazed.

The township as a whole is rough, rocky and broken. The portion of it fit for agricultural purposes being but limited, consisting principally of a narrow belt in the valley on each side of Elk Lake, where the land is fairly level and the soil of good quality.

The soil in the valley on each side of Elk Lake is a rich clay mixed with sand, but in general throughout the township it is a sand and gravel mixture, very shallow on the rocky and stony land.

The timber in the township is principally green, and consists of spruce, jack pine, poplar, birch, cedar and balsam of fair size and dense growth. Some very large poplar, cedar, birch and scattering white and red pine being found in the vicinity of Elk Lake, some tamarac, which is all dead, being found in the swamps.

A large amount of spruce and cedar in the township is most suitable for pulpwood and railways ties, and can be readily got out by way of the Montreal River.

Elk Lake, which is an expansion of the Montreal River, enters the township at the north boundary on lots nine and ten, flows southeasterly through the township and leaves it on lot one in the second concession.

Bear River enters the township by two branches, the north branch entering on lot twelve in the second concession, and the south branch on lot ten in the first concession, and thence both flow northeasterly, uniting on lot eight in the third concession, and thence flowing northeasterly to its junction with Elk Lake on lot six in the fifth concession. This river we found navigable with canoes from its junction with the lake to near the junction of its branches, two short portages having to be made around rapids, one on lots six and seven in the fifth concession and the other on lot seven in the fourth concession. These rapids would form excellent waterpower for milling purposes and the rapids, which are numerous on either branches of the stream above the junction of its branches could be utilized for the same purposes.

The general character of the rock formation is grey granite or gneiss, no indications of minerals were found during the progress of the survey.

Signs of large game, such as bear, moose and red deer were plentiful, and a few of the last two named were seen during the survey. Wolves were heard in the distance, but no signs or traces of them were seen. Of small game, partridge and duck are to be obtained, and pike, pickerel and bass were caught in Elk Lake.

The mean variation of the magnetic needle I found to be eight degrees, forty-five minutes west.

The only settler found in the township was an Indian by the name of Taylor, who, with his family, reside on the south part of lot six in the fifth concession, on the west side of Elk Lake, south of the mouth of Bear River ,where there is a shanty built and a small clearing made, some fine potatoes and other vegetables being grown here. On the east side of the lake, in the north part of the same lot, is another small clearing, on which there is built a fine, almost new, log shanty, which, I was informed, a Mrs. Laforge claimed to own. No settler was found there, but the Indian has charge of the shanty. Another small clearing, at which we first landed in the township, is on the north part of lot one in the second concession, on which there is a number of old log buildings, in a dilapitated condition. Mr. H. G. Woods of the Hudson Bay Company's station at Temagami states he has purchased an Indian claim to this property.

I submit herewith a plan of the township and field notes of the survey, etc.

I have the honor to be, sir,
Your obedient servant,

(Signed) ALEXANDER BAIRD,
Ontario Land Surveyor.

HON. E. J. DAVIS, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 33.)

TOWNSHIP OF BARBER, DISTRICT OF NIPISSING.

Leamington, Ont., December 28th, 1903.

SIR,—I beg to submit the following report on the survey of the township of Barber, in the District of Nipissing, performed under instructions from your Department of date twenty-ninth of June, A.D., nineteen hundred and three.

Immediately after completing the survey of the township of James, on which I have recently reported, I proceeded with my party down the Montreal River to the iron post planted by me last year to mark the southwest angle of the township of Cane, and which was to be the starting point of my survey for the township of Barber. Having there obtained an observation of Polaris, I ran a line due west astronomically from this iron post six miles, planting posts thereon forty chains apart, at regular intervals, from the starting point, to mark the front angles of the lots in the first concession, and from each alternate one of these posts the side lines between the lots were run due north astronomically. Posts were also planted at regular intervals of eighty chains apart from the southeast angle of the township north along the east boundary, and the lines for the front of the several concessions were run due west astronomically therefrom, and on each line, as directed, posts properly marked were planted.

An iron post was planted on the line run for the south boundary of the township at the end of the sixth mile alongside of a wooden post, to mark the southwest angle, and from these posts the west boundary of the township was run due north astronomically, striking the iron post at the southeast angle of the township of James.

The iron posts supplied me, "properly marked," were planted, as directed, alongside the wooden posts, one at the intersection of the south boundary with the line between lots six and seven, one at the intersection of the line in front of the fourth concession with this line of lots and one at the intersection of this line of lots with the north boundary, also one at the intersection of the east boundary, with the line between concessions three and four and one at the intersection of the line between these concessions and the west boundary; these iron posts being planted with the view to insuring permanency for the survey in case of fire.

The township in general is very level, with a few high rocky outcrops to the west of Mountain and Spring Lakes and in the centre of the township.

At least two-thirds of the township is fine land, well adapted for farming purposes.

Where low and flat the land is readily drained by the Montreal River and the large creeks in the township.

The soil apparently is of excellent quality, being in general a sandy clay mixture, intermingled with fine gravel in places.

The large creeks emptying into Mountain and Spring Lakes from the west are navigable with canoes for some distance up from their mouths and can be utilized for floating the timber of the west portion of the township to the Montreal River.

The township is rich in timber of good size and dense growth, consisting of jack pine, spruce, cedar, poplar and birch. To the west of Spring Lake, in the first, second and third concessions, there is a fine stretch of white pine of great length and large diameter, and on the east side of this lake, on lots three and four in the first and second concessions, a fine grove of red pine was found.

The timber of the township can be readily got out through the Montreal River, which, with its wide expansion, known as Mountain Lake, may be said to traverse the township from northwest to southeast.

Spring Lake, in the township, is a beautiful sheet of fine, clear water, and is connected with the Montreal River a short distance south of the township, through Spring Creek.

A fine water power is available in the Montreal River at the rapids in the south part of lot five in the fifth concession, where the descent is about ten feet in eight chains and around which it is necessary to portage on the east side of the river.

Frequent observations for azimuth were taken when the weather would permit, and the average variation of the magnetic needle found to be eight degrees, thirty minutes west.

Signs of red deer, moose, bear and wolves were seen during the survey, and an Indian residing in the township trapped two of each of the three last mentioned while we were in the township.

The only settlers found within the township were a number of Indians residing on the north part of lot ten in the sixth concession, where they have small clearings on each side of the river and a number of log shanties (in which they reside), built on the east side of the river. One of these Indians informed me he had been a resident there for the past fifty years.

Accompanying this report will be found a plan of the township and field notes of the survey, with accounts in duplicate. All of which are respectfully submitted.

I have the honor to be, sir,
Your obedient servant,

(Signed) ALEXANDER BAIRD,
Ontario Land Surveyor.

Hon. E. J. Davis, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 34.)

TOWNSHIP OF AULD, DISTRICT OF NIPISSING.

Ridgetown, Ont., December 30th, 1903.

Sir,—I have the honor to submit the following report of the township of Auld, in the District of Nipissing, performed under instructions dated June the twenty-ninth, A. D., one thousand nine hundred and three.

Leaving Ridgetown on the twenty-seventh day of July last, our party proceeded by rail to Temiskaming, at the foot of the lake bearing the same name. Thence by steamship up the lake to Haileybury. Having procured our supplies we left the following morning (July thirtieth) by waggon road to Bay Lake. From this point we had a splendid canoe route up the Montreal River to our township. Having found the iron post at the southwest angle of the township of Lundy, I marked it on the northwest side Auld, and ran west astronomically a distance of six miles, planting wooden posts at regular intervals of forty chains, also a small iron post at the end of the third mile, to mark the point between lots six and seven, and a larger one at the end of the sixth mile, to mark the southwest angle of our township; marking the same on the northeast side Auld, on the north side concession one and the east side lot twelve.

The lot lines between lots two and three, four and five, etc., were run north astronomically, and posts properly marked were placed at their intersection with the several concession lines. Iron posts of the smaller kind were planted at the front of the fourth concession on the east boundary, between lots six and seven of the same concession, and on the west boundary.

The west boundary is a meridian line run from the end of the sixth mile of the south boundary, but, owing to the deflection in the west boundary of Lundy, does not strike the iron post planted at the southwest angle of Cane, accordingly a large iron post was planted, marked on the southeast side Auld, on the east side lot twelve and on the south side concession six. All the lines were well opened and blazed.

With the exception of the northwest corner, which is swampy, the township is rough and rocky and not well adapted for agriculture.

The soil in general is a sand and clay mixture, with a clay sub-soil; in some sections, however, gravelly soil is to be found, but not to any great extent.

No minerals were found during the progress of the survey, but there was considerable local attraction in some places.

The waters were all traversed within the limits of the township, and connected with the lines of the survey. A Foster Micrometer was used in all measurements connected with the same.

Th township, as will be seen by the map, contains five lakes, apart from Indian Lake, which is an expansion of the Montreal River.

The township is covered with jack pine, spruce, poplar, tamarac, cedar, balsam and birch, ranging in size from six to eighteen inches. Some scattering large white pine were found in lots two and three in the first concession, and along the south boundary, in lots ten, eleven and twelve. No section could, however, be set apart for milling purposes.

A settler's shanty was found on lot eight in the fifth concession, bordering on Indian Lake. There is about three acres cleared.

A number of moose, red deer and bear were seen during the survey. Wild duck and partridge were also plentiful.

The mean variation of the compass was eight degrees, thirty minutes west.

All of which is respectfully submitted.

I have the honor to be, sir,
Your obedient servant,
(Signed) THOMAS SCANE,
Ontario Land Surveyor.

Hon. E. J. Davis, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 35.)

TOWNSHIP OF INNES, DISTRICT OF THUNDER BAY.

Port Arthur, Ont., Dec. 23rd, 1903.

Sir,—I have the honor to report that in accordance with your instructions dated September sixteenth, A.D., nineteen hundred and three, I have completed the survey of the Township of Innes, situated on the south side of McIntyre Bay, Lake Nepigon, and east of the meridian run by me last summer, the north six miles of which is the west boundary of the township.

The concession lines were run east astronomically from the mile posts on the meridian which were marked with the proper concession and lot numbers. Innes was marked on the southeast of post at northwest corner, and on northeast of post at southwest corner. Substantial wooden posts were planted at each half mile and marked with the proper concession and lot numbers. One and seven eight inch iron posts were planted alongside wooden ones at the northeast and southeast corners of township marked Innes, and concession and lot number. One and one-quarter inch iron posts were planted alongside wooden ones in front of concessions one, four, and on bay shore between lots six and seven, these latter being planted with the view of insuring permanency for the survey in case of fire. The side lines were run north astronomically at each mile.

The township is generally well covered with spruce, birch, poplar and tamarac, from six inches to fifteen inches in diameter. On the high, rocky ridges small spruce, jack pine and birch prevail; a few white and red pine were found near the northeast corner. Outside of this small bunch I only saw five pine trees in the township. I found large birch and poplar trees eighteen inches in diameter growing over old burnt pine stumps, showing that a long time had passed since a forest of large pine had been destroyed.

There are no large streams in the township. The two largest empty into McIntyre Bay, through lots six and seven, concession six. These are about twelve feet wide by two feet deep until they reach the flat land near the bay shore, when they spread out to fifty feet wide in a marsh, with no perceptible current.

There are no large lakes. Krug Lake, the largest, is about one mile long by one-half wide. The rest are generally shallow, with occasional beds of reeds.

I estimate that over forty per cent. of the township is suitable for farming. This is without taking into account the swamps, which have a sandy bottom, and are not very wet.

The southwest sixteen lots, being mostly trap rock, are practically useless. The eastern eight lots in concessions one, two, three have generally a considerable area of sandy loam, but mixed in places with boulders. About twenty-five per cent. is fit for cultivation. Going north, the land improves very much in concessions four, five, six. The soil is a very rich, sandy loam, slightly rolling. On the west five lots of concession four there are some boulders, and on lots six and seven, concession six, there is a large wet marsh, the bottom of which is about level with the waters of the bay. Otherwise this is a good tract of land. From lot eight to the east boundary the shore of the bay is flat and sandy. From lot eight west the shore is chiefly trap rock, with small sandy bays.

There is a very fair harbor at the northwest corner, with deep water and well sheltered.

No economic minerals were found. Nepigon trap is the prevailing rock. This caused the compass to vary from three degrees west to five degrees east. Th shore of McIntyre Bay was carefully traversed with micrometer and compass, which was set to read true north. Check sights were taken to most of the prominent points, as well as tying the traverse to all township lines.

There is an Indian Reserve in the northeast corner, with a population of about twenty Indians, looked after by an Episcopal clergyman. The Indians have about fifty acres cleared, but, except raising a few potatoes, do no farming. The land is good, sandy loam.

I have the honor to be, sir,
Your obedient servant,

(Signed) A. H. MACDOUGALL,
Ontario Land Surveyor.

HON. E. J. DAVIS, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 36.)

TOWNSHIP OF POTTS, DISTRICT OF RAINY RIVER.

Fort Frances, Ont., January 5th, 1904.

SIR,—I have the honor to submit the following report on the survey of the township of Potts, in the District of Rainy River, performed under instructions from your Department, dated the fourteenth day of July, A.D., nineteen hundred and three.

This township is bounded on the south by the townships of Mather and Kingsford on the west by meridian line run in the year eighteen hundred and ninety-two by Ontario Land Surveyor Niven, and on the east and north by unsurveyed lands.

I commenced work on the fifth day of August, moving in by team from Stratton Station, on the Canadian Northern Railway. The north boundaries of Mather and Kingsford were first cleared out and re-run, and then Niven's meridian line. I chained east along the north boundary of the township of Mather, as directed, but could find no post at the southeast angle of the township of Potts. I therefore commenced the east boundary from the point directed, namely, nine chains west from Niven's six mile post, and five chains forty-six links west from Ontario Land Surveyor Meadows' post, lots ten, eleven, township of Kingsford. I then laid out the second concession and side lines, west astronomically and north astronominally, respectively, as directed in the instructions, as nearly as possible. Iron posts were planted in the places directed and wooden posts at the other necessary points, the former being planted with the view of insuring permanency for the survey in case of fire.

Great difficulty was experienced in laying out the fourth and fifth concessions, as the dam on Boundary Creek had been left closed, and consequently a large area was submerged. Having no appliances to open the dam, I had to remove one stop log at a time, and wait until the water fell sufficiently to permit the removal of another, and so on until all were removed. I was then able to proceed, and succeeeded in getting past the drowned land, but it was very wet work.

The first three concessions were mainly composed of good land, rather stony in places, but easily cleared and available for agricultural purposes. The northerly three concessions are very rocky and hilly and of little value.

No valuable minerals were indicated, the magnetic needle showing a steady variation of about eight degrees thirty minutes east throughout the township.

Fires have run over all the township with the exception of a small part north of Off Lake. All the valuable pine has already been cut, and only a few scattering bunches of pine are left, which will be of value to settlers.

A large portion of the three southerly concessions has been burnt thrice, and has only a heavy growth of small poplar and brush, which can be very easily cleared off.

Accompanying this report are plans, field notes and timber plan, which I trust will be found satisfactory.

Samples of rock from various points of the township have also been sent.

I have the honor to be, sir,
Your obedient servant,
(Signed) D. J. GILLON,
Ontario Land Surveyor.

HON. E. J. DAVIS, Commissioner of Crown Lands, Toronto.

(*Appendix No.* 37.)

TOWNSHIP OF RICHARDSON, DISTRICT OF RAINY RIVER.

Fort Frances, Ont., January 5th, 1904.

SIR,—I have the honor to submit the following report on the survey of the township of Richardson, in the District of Rainy River, performed under instructions received from your Department, dated the fourteenth day of July, A.D., nineteen hundred and three.

The township is bounded on the west by the township of Sifton, on the south by the townships of Tait and Mather, on the east by the newly-surveyed township of Potts, and on the north by unsurveyed lands.

Each of the four corners of the township was marked by an iron post, marked with the names of the surrounding townships. These posts were subsequently marked with the name Richardson on the side facing this township Other iron posts supplied by your Department were marked and planted as directed in the instructions, these being planted with the view of insuring permanency for the survey in case of fire.

I moved into this township from the adjoining township of Potts, the survey of which I had just completed, and surveyed the concession and side lines, as directed in the instructions, east and west astronomically, and north and south astronomically, respectively, as nearly as possible. I commenced at the southeast angle, running due west along the north boundaries of the townships of Tait and Mather, planting posts at intervals of forty chains on the north boundary of Mather, and on the north side of the Tait road allowance, that is, one chain north from the line run for the north boundary of sections in the township of Tait. From these posts I ran the side lines astronomically north.

I ran the several concession lines due west astronomically from the points of intersection of the concession line in the township of Potts with the meridian line run by Ontario Land Surveyor Niven, in the year eighteen hundred and ninety-two.

The north boundary I ran due east from the northeast angle of the township of Sifton, as directed in the instructions.

The southern half of the township is composed of first-class land, very easily cleared and consisting of good clay loam. The northern half is very broken, rocky and hilly, and not well adapted for agricultural purposes, although some good land can be found in the valleys between hills. The whole of the township has been burned over. Three fires have evidently crossed most of the land, and where this has been the case everything has been burnt, and, with the exception of a few swamps which escaped, no timber has been left, the land being covered with a thick growth of small poplar and brush. Where only two fires have crossed the second growth is larger and a good deal of windfall encumbers the ground.

Much wet weather was experienced during October, and it was only with difficulty that the work proceeded until the twenty-second day of that month, as Pine River and all the creeks had by that time overflowed their banks, and every swamp was full of water. Work became impossible without all hands being wet to the skin from morning to night, consequently the men refused to work any longer. I was therefore compelled to stop work until the land dried or froze.

I returned again on November fifth and completed the survey.

There is no merchantable timber in the township, but the north boundary passes close to a long, scattering range of white and red pine, extending from lot eight to the meridian line.

Moose, caribou and red deer were very plentiful, as also were cayotes, which could be heard in the distance every night. Pine River, and some of the other creeks are well stocked with beaver, whose dams had much to do with the overflow of the creeks.

No indication of mineral was found, the magnetic needle holding a very steady variation of eight degrees forty minutes east throughout the township.

Accompanying this report are plan, timber plan, field notes and list of squatters, which I trust will be found satisfactory.

I have the honor to be, sir,
Your obedient servant,

(Signed) D. J. GILLON,
Ontario Land Surveyor.

Hon. E. J. Davis, Commissioner of Crown Lands, Toronto.

(*Appendix No. 38.*)

ALGONQUIN NATIONAL PARK.

To the Honorable the Commissioner of Crown Lands:

HONORABLE SIR,—I beg to hand you a report of the work performed, etc., for the year 1903 by the Algonquin Park staff.

The staff for the past year has been composed of ten rangers and myself. During the trapping seasons the usual work of patrolling the Park has been carefully carried on. Some trappers have been caught and punished, but I am pleased to report that very little trapping has been reported by the rangers from their several sections. It is gratifying to note that they all report fur-bearing animals of all kinds on the increase, especially the beaver, which are to be found in abundance in all sections. Otter are also reported very numerous. Ranger Sawyer reports caribou in the north end of the Park. It may be quite possible that they are working south, as numbers of them are to be found in the neighborhood of the Kipeewa and Temiskaming lakes. The red deer are increasing rapidly and becoming very tame, so much so that this year a doe came to where the section men of the Canada Atlantic Railway were taking dinner and took bread from them.

Of clearing on portages, making snow-shoes, repairing canoes, etc., the usual amount of work has been done. On Hogan's lake a splendid shelter has been built, on altogether new lines. The logs were all sided; lumber was cut with a pit-saw for floor and roof, and the hut well shingled, good windows and a door put in, and a building completed that will last for many years.

As usual, the rangers have put out a lot of poison for wolves, and several have already been destroyed. They continue numerous, and this fall might often be heard at night from headquarters.

We had last year double the number of visitors of any previous year. They come from all over Canada and the United States, and all express themselves as delighted with the Park, the fishing and the abundance of game of all kinds easily to be seen. One gentleman from Toronto told me this past summer that he saw twenty deer in one afternoon's walk. It is very encouraging to note that more of our own people are taking advantage of the delights of the Park in canoe trips and fishing excursions, and not one have I heard express himself as disappointed in any way.

Fifty-three capercailzie were brought from Norway by the Fish and Game Commission and liberated in the Park. These birds were in splendid condition, considering the journey, and there is every reason to believe they will do well here. Several have since been seen by different parties, apparently quite reconciled to their surroundings, and in good, healthy condition. I would strongly recommend a special clause in the general game laws protecting these birds, as they evidently make long flights, and will doubtless spread all over the country. I do not think there is a doubt of the success of the attempt to introduce them into this country. The fishing has been good this year, and the bass introduced into these waters have increased wonderfully.

I have the honor to be, sir,
Your obedient servant,

(Signed) G. W. BARTLETT,
Superintendent.

(*Appendix No.* 39.)

RONDEAU PROVINCIAL PARK.

To the Honorable the Commissioner of Crown Lands:

Sir,—I have the honor to submit this my report as caretaker and ranger of the Rondeau Provincial Park for the year 1903.

This year saw the completion of the road begun in 1902, leading from the town-line between Howard and Harwich right up to the picnic grounds, and already the benefit is apparent in the increasing numbers of people who visit the Park.

As time goes on, we see more and more the necessity of the road being extended up through the bush to the sand-bar, four and a half miles further, a survey of which should be made as soon as possible. Then we would have ready access to the grounds which are most accessible to persons of poaching disposition, and would be in a much better position to protect the Park game. The road would make a very attractive drive, as some of the finest timber is situated in that portion of the Park through which it would run.

During the winter of 1894-5 a first-rate dock was built on the Rondeau Harbor side, near the picnic grounds. At the end of each winter when the ice breaks up it comes down in great masses, driven by the force of the high winds. The effect of the ice on the dock has been to injure it considerably, and unless given prompt attention it will need rebuilding from end to end. What is wanted is a stone crib, say 14 by 40 feet in size, across the end, or in the form of a T. The planking of the dock shows very little sign of decay, but some of the stringers and a few of the piles will require renewing, and the railing replaced.

The old structure that has until now been used as a restaurant is unsuitable for the purpose, and a new and better building should be erected.

The barn and stable should be raised and a concrete foundation, with new joists and flooring, put under it.

Another improvement much urged by the public is that the pavilion be supplied with curtains, for use in case of rain and wind storms. This is the only place of shelter on the grounds for picknickers, and as the building is constructed with open sides, it is deficient in protection against wind and rain. It has also been urged to have better lighting for the pavilion and grounds at night.

If the Government should conclude that all the large timber on the Park, say of 22 inches in diameter and upwards, could properly be disposed of by tender or public auction, it would bring in a large sum of money, enough to pay for all the improvements required at the Park, and create a revenue for the Province as well. I am satisfied, too, that the cutting and removal of the larger timber would leave the bush in better condition as a windbreak. If the younger and stronger trees were given a chance to grow up by taking out the old ones, the number of trees blown down by the wind every year would be fewer. The undergrowth is becoming so dense that it is almost impossible in places for a man to walk through it.

The game and deer on the Park, both in the enclosures and at large, are doing as well as in other years.

I have the honor to be, sir,
Your obedient servant,

(Signed) ISAAC GARDINER,
Caretaker and Ranger.

Morpeth, 25th January, 1904.
